

PRODUCT CATALOGUE 2023-24

B-stedt of Sweden AB is a Swedish family business, that founded and still owns the Beyond-X brand.

Originally started back in 1987 distributing Spyder ski wear. As such, we developed and produced the worlds first alpine ski uniform program, Spyder Pro-Gear. This production in turn triggered the start of our first Polish joint-venture sewing factory in 1994.

In 1999 the Beyond-X brand was founded, focusing exclusively on alpine ski team uniforms.

At the same time our own Beyond-X Polska sewing factory was started.

Over the years the product range has widened to now also include a wide range of ski area utility products. Because without ski areas, ski racing would still be in its original form.

Our focus has always been to produce smart, functional and high-quality products, at a reasonable price. Huge growth and profits were never our goal. Nor to build up a brand, that later could be sold to investors.

Instead, we have searched for smart solutions, that over time would generate great value to our customers.

This includes, but is not limited to, re-order ability for a minimum of 3 years, not limited to once a year, but several annual production cycles, many customizing options, no order minimums and materials that within financial reason, will function and hold up over time.

The result, uniforms that will last maybe twice as long as others, that will stay intact over many years, and be extremely user friendly.

Another effect of how we run our business, is that we hardly do any over production. The majority of our production takes place

close to our main markets, in a Polish factory subject to strict EU labor and chemical laws.

And considering the amount of Greenwashing going on today, we must be one of the most sustainable producers in our product segment. And we have been doing this for the past 30 years!

Solar panels in Degerfors

Add to that, that 30% of our factory and 100% of our Swedish office and storage facilities electric power consumption is provided by our own solar power installations.

We are honest, we do not make promises we can't keep and we do not run marketing campaigns or construct order systems that aim to force customers to buy more product than needed. We call this "No Bullshit Skiwear"!

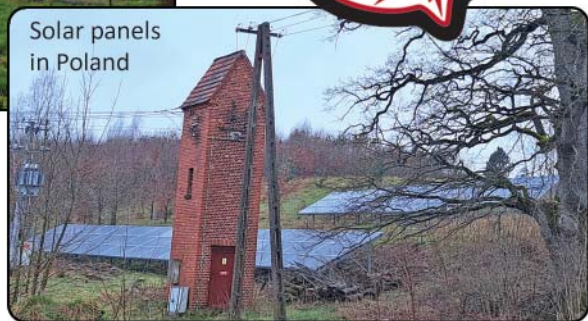

But the same goes for our entire product range. This is different, not the way it usually is done, and maybe not always the smartest. But we can live with a good conscience. And that is important!

Over the years we have become a sort of alpine skiing's advertising bureau. Offering

Solar panels
in Poland

sponsor logo printing on most of our products. By means of adding sponsor logos, several of our products can become free of charge. Or even become a source of income, that can aid in customers program funding.

We have been, and still are, an innovative driving force, that has shaped our sport.

As already mentioned, in 1994 we developed the worlds first real alpine uniform program, enabling custom coloration and re-order ability. Today all team uniform programs must offer this.

In 1999 we where the

first to use digital sublimation printing for production of alpine race suits. Until then, it had only been used for sample production. Today many product categories are printed this way.

2009 we did not invent slalom pole brush bases, but where the ones that spread the use of these, and also made them accepted on high level competition.

In 2014 we developed digital sublimation printed C-net, that changed the C-net use to also become an advertising tool.

And the process continues with constant developments or improvements, large or small ones. View our product catalogue and see the result!

Welcome!

DIGITALLY PRINTED
JACKETS & PANTS

Individually fully printed ski jackets and pants. A development sprung from years of experience in digitally printing race bibs, gate panels and race suits.

Virtually everything printable on your home computer printer, can be printed onto our garments. The only limitation is your imagination!

It is however, no easy task to develop such own fully printed garment print design. The garments consist of many parts. If it would have been easy, this would have been done long time ago! Contact your local representative for more information and help.

B628b- Print.
BA518b Print/2Bk/2Bk/CBk.

B628b-, Shell jacket in 3-layer fabric with water resistant zippers, chest pockets, side pockets, inside pocket and key card pocket. Snap attachment for optional B691b-/B692b hood.

B613Wb, Ladies cut model of B613b.
 Sizes: XS-L.

B629b, B692b & B613b Print

B628b-
Print

Important note! Digital printed garments are not as fading resistant as those made of dyed fabric. Since ink is only applied to fabric surface, a denim like look can soon appear (as a result of white fibers being pulled up to the fabric surface). Especially on dark prints.

Digital printed garments on pages 4-6 can be ordered unprinted too, in standard dyed fabrics.

Customizing Beyond-X clothing

All Beyond-X clothing can, in one way or another, be customized. It can be by custom coloration, prints, embroideries, patches and so on. All jackets and pants can be custom colored your own way, according to a system where garments are divided into areas, where you select color of each area. That means thousands, sometimes millions, possible color ways of a garment.

Palette here shows available colors. In our web site www.beyondx.com you can select "ColorLab" and play with coloration online. Just click color and area, and you can see the result directly on screen.

In addition, many of our models can include prints. Coloration, pattern and logos, everything is printed in one operation.

We also have in-house embroidery and patch service department. Send embroidery programs and patches to us with instructions. We apply and tape backing for water resistance, before garment is assembled.

Contact us for more info.

Beyond-X jackets and pants are part of our team uniform program. Regardless if you are a private person, team or ski area, you can color your garment after your own mind, and order one single piece.

Reorders of exact same garments is possible for at least another three years, often up to five years.

Our uniforms are offered in kids and adult sizes, where some models are also available in ladies cut/sizes.

Uniforms can be ordered as shell or insulated, in 2- or 3-layer fabrics and some models can be partially custom printed.

Nowadays we also offer fully custom printed uniforms, see pages 4-9. Possibly, this is the most flexible ski uniform program in the world.

Individual coloration can be done in our online ColorLab at www.beyondx.com. For designs that includes own custom prints, contact your representative, for information and help.

Our light and flexible fabrics offer 20.000mm water resistance and 20.000g/m²/24h air permeability, in 2- or 3-layer fabrics.

Beyond-X is the world's leading alpine race suit producer. In addition to our own race suits, we also produce for several competitors.

We were the first to offer digital sublimation printed suits almost 25 years ago. That today is the standard process.

From us you can order padded GS (removable pads), or none padded DH suits, regular fit or slim fit suits, FIS or none-FIS suits.

We have no order minimums. So, you can order one single suit in your individual print design. And it can be ordered and produced year around.

For years we have been working hard to resolve the most common race suit complaint, fabric pilling. Since a few years, both our FIS and none-FIS fabrics are of Low-pilling kind, that offer far greater resistance to fabric pilling, yet retaining great elasticity, fit and comfort.

- We offer standard print designs, available in several standard colorways.
- A Colorlab, where 6 standard designs can be color blocked from a standard color pallet.
- All the above suits can have logos added, for a small extra fee, provided proper instructions and logos in vector format (like .ai or .crd files), not pixel (like .png or low resolution .jpg files) format, are supplied.

design

• The Colorlab designs can also be used as a base, from where alterations can be made, and logos be added. There will be a design fee for such work.

• And finally, completely own designs can be generated. Again, provided proper instructions and logos in vector format (like .ai or .crd files), not pixel (like .png or low resolution .jpg files) format, are supplied. Work on such designs will be charged / hour.

Suit Design No. 1 / Richi Leitgeb

Own ready-made designs, made well enough to be used in production, will not be charged any development charge.

We can print essentially everything that our customers can print out on a regular computer printer. The difficulty lies in making placement fit on the 3D body of the athlete.

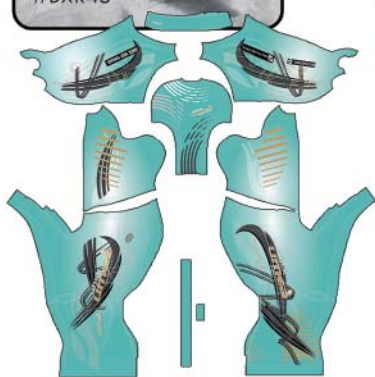

A clear idea and good instructions will be of great help.

Color preferences in Pantone Solid Coated color # (PMS #) will also be useful.

These pages show only a few examples of print designs we have produced. And if the process started with a phone call, a photo of something in the design direction, written instructions, provided illustrations, or ready-made artwork.

For FIS suits, FIS advertising rules must be considered. No single sponsor logo shall exceed 100 cm². The logo must fit inside a 100 cm² rectangle. Total surface of all sponsor markings shall not exceed 450 cm². Remains 370 cm² once the three mandatory Beyond-X logos on the suit, have been deducted. No sponsor marking in the bib area.

All FIS suits are available in sizes S-XXXL, and none-FIS suits in sizes XXS-XXXL (See race suit size table on page 82).

BR37 FIS GS suit (also available in SlimFit cut **BR237**).

BR39 FIS DH suit.

BR43 None-FIS GS suit (also available in SlimFit cut **BR243**).

BR45 None-FIS DH suit.

New ColorLab

Actual fabric colors may look slightly different than they appear on your screen.

Below color code should be used when ordering this design:

Valhalla Pw/Bk/12/PV

To share this design, send following link:

https://www.colorlab.com/race/suits/valhalla_pw/bk/12/pv

Save as PDF

Our new race suit ColorLab makes it easy for someone that lacks computer graphic program, or the skills to generate own print graphic designs. Choose among 6 different print designs, and color-block them by choosing any of the 25 available standard colors, for each area of the design. By coloring 2 or 3 color ranges with the same color, some design objects will disappear.

The ColorLab could also help customers to make some headway when generating own print design, by using the ColorLab as a base, and then make alterations, add logos and/or other design elements.

To the left a Speed print design with added gradient and stars in color range 3. To the right a Raptor design with added logos, and different background pattern.

Warning! All highly elastic fabrics pill. To minimize fabric pilling avoid contact with abrasive surfaces, such as Velcro.

B-stedt Polska Sp. z o.o.

What really sets Beyond-X apart from the rest is that we, as one of few brands, own our very own production facility B-stedt Polska.

Founded in 1999, this is the core of our operation, and is the reason why we can offer such incredible flexibility, wide product range, no order minimums, and great delivery reliability.

To operate a 70 employee operation is at times very demanding task to handle. However, being located inside EU, with almost all operations in-house, this offers unique advantages, that our competitors can only dream of!

Extremely short lead times, with no order minimums! This is something that normally does not exist! For products like race bibs or digital printed C-net, this is a key factor for success. We are simply in control, and not dependent of others.

The combination of digital printing and sewing is our specialty. We are a world leader producer of alpine race suit. We also produce these for a number of other brands. Today the factory also is producing far more than skiwear. Including slalom poles, Safety mattresses, kids ski area playground articles, safety and crowd-control fencing, signs, gate panels and luggage, to name a few.

Our extreme flexibility has triggered a demand to generate a group identity, by using race bibs. No order minimums, re-order ability, and the possibility to add individuals names, have made many teams order our bibs. An added benefit is that coaches more easily can identify their skiers from a distance.

STRETCH BIBS

Our all digital printed stretch race bibs, have grown very popular.

We have no order minimums. The prints can include millions of colors, unlimited number of logos, without any price increase. And additional or lost bibs can be re-ordered.

Our stretch bibs are produced of a high quality 4-way highly stretchable fabric that with ease fits a large size range, and will keep on looking great for many years.

We offer a large variety of stretch bibs, in many sizes. Since they are durable and also work well in water, an ever growing range of other sports understand their advantages. We have been responsive and have developed a number of specialized stretch bibs for other sports.

SBZ631D

SB831DD FIS Snowboard GS panel

FIS approved snowboard panel 130x100x20cm, with 40cm high stubbie tunnel. 2-layer mesh fabric and double side print (correctly turned).

SB830 FIS Snowboard GS panel

Like SB831DD, but 1-layer mesh fabric in standard colors. Can be screen printed from one side.

SBZ831D FIS Snowboard GS panel

Like SB830, but printed from both sides. Where back side appear mirrored.

SB730 FIS SkiX panel

FIS approved snowboard and SkiX SL panel 100x80x20cm, with 40cm high stubbie tunnel. In 1-layer mesh fabric in standard colors. Can be screen printed from one side.

SBZ731D FIS SkiX panel

Like SB730, but printed from both sides. Where back side appear mirrored.

SB530 FIS SkiX SL panel

Like SB531DD, but 1-layer mesh fabric in standard colors. Can be screen printed from one side.

Snowboard panels are preferably mounted on a PC160W pole and a ST40.XB stubbie.

SNOWBOARD & SKI-X GATE PANELS

SBZ631D SkiX panel

SkiX and snowboard SL panel 105x800x10cm. In 1-layer mesh fabric printed from both sides. Where back side appear mirrored.

SB631DD SkiX panel

Like SBZ631D, but in 2-layer mesh fabric and double side print (correctly turned).

SB531DD FIS SkiX SL panel

FIS approved SkiX and snowboard panel 105x80x40cm. 2-layer mesh fabric and double side print (correctly turned).

ST450 Stewards Bib

Sizes: M-XXL

SX410b Stewards Bib, a 5cm longer version of SX410 Men's SkiX Bib.

M430 Mogul Race Bib

Sizes: M-XXL

SX420 SkiX Bib, men's size race bib, also available as SX421 Women's size and SX422 Kids size.

SX450 Work Bib, with sewn reflex and front zipper. In men and ladies size.

ST461 Motorsport Stewards Bib, with rear pocket. Also available as ST460 without rear pocket.

AB485 Arm Band, adult size 4-way stretch arm band 21cm high. All sublimation printed. Also available as AB484 Kids size, 17cm high, that also could be used as a leg band.

AB500 Stretch Arm band, 8 cm wide, one-way printed 2-way stretch arm band.

AB510 Stretch Arm band, same as AB500 but with adjustable Velcro closure.

AB480 Arm Band, 4-way stretch adult arm band. 12cm wide. Also available as AB48 Kids size arm band.

ARM BAND & STEWART BIBS

SX410b

SX410b

ST450

AB500

Backdrop #BD360x190.

A relatively inexpensive 3.6m wide and 1.9m high award ceremony backdrop. One side digital print. With upper sewn in fiberglass rods, to keep nicely stretched. Sewn mounting pole tunnels, with elastic Bungee-cords at each end. Mounted on 4, 250cm long B-net poles.

SP580D

Custom printed info-panels

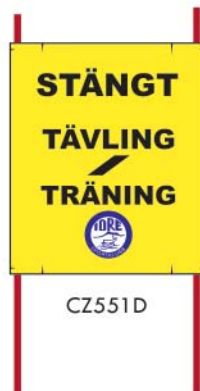

Digitally printed, no order minimum. Fibre-glass rod at upper edge prevent panel from hanging.

SP580D Big Information Panel

150x145cm panel in one layer thin mesh fabric with digital print on one side. Print bleeds through to back side with about 70% intensity and will appear mirrored. Preferable mounted on two PC215/31 poles.

C551D Information Panel

95x115cm panel in one layer mesh fabric with digital print on one side. Print bleeds through to back side with about 70% intensity and will appear mirrored.

CZ551D

Start/Finish panels. Fully digitally printed 70x170cm, mounted on 2 pc. 31mm 215cm poles (not included).

SFZ561D Start/Finish Info Panel

One layer heavy mesh fabric, back side is printed mirrored but as clear as the front print.

SF561DD Start/Finish Info Panel

Two layers heavy mesh fabric, both sides appearing correct.

#KA400b Kick panel

Rectangular gate panel for marking of kick-jump crests. All digital printed. 20x40cm double fabric layers with in-between stiffener. Preferable mounted on hinged pole #ST-40FW.

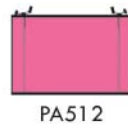

#KA410b Triangular kick panel

Same as #KA400b, but with a triangular 30x43cm shape. Easy Bungee cord attachment.

Gate panels in standard fabric colors with 1-color screen print from one side:

#BXR97, FIS GS, SG & DH gate panel 75x50cm.

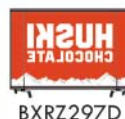

#PA512, Non-FIS 75x50cm gate panel.

#PA510, Non-FIS 55x40cm kids gate panel.

1-layer digitally printed panels, back side mirrored:

#BXRZ297D, FIS GS, SG & DH 75x50cm gate panel.

#PAZ513D, Non-FIS 75x50cm gate panel.

#PAZ511D, Non-FIS 55x40cm kids gate panel.

NEW!

#GXRZ297D, Like BXRZ297D, but made from net fabric.

#GAZ513D, Like PAZ513D, but made from net fabric.

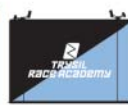

#GAZ511D, Like PAZ511D, but made from net fabric.

2-layer digitally printed panels, back side correct:

#BXR297DD, FIS GS, SG & DH 75x50cm gate panel.

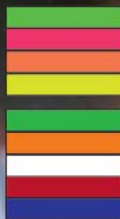

#PA513DD, Non-FIS 75x50cm gate panel.

#PA511DD, Non-FIS 55x40cm kids gate panel.

ALPINE GATE PANELS

Standard
gate panel
colors

Edge
band
colors

PA512 GS Training Gate Panel

75x50cm gate panel in standard panel fabric color that can be screen printed on one side. The print is visible only on one side. The panel is sewn with reinforced edge bands.

PAZ513D GS Training Gate Panel

75x50cm gate panel in one layer heavy mesh fabric with digital print on both sides. Back side is printed mirrored but as clear as the front print. The panel is sewn with reinforced edge bands.

PA513DD GS Training Gate Panel

75x50cm gate panel in two layers heavy mesh fabric with digital print on both sides and both appearing correct. The panel is sewn with reinforced edge bands.

Alpine gate panels

We offer a wide selection of gate panels.

FIS-homologated gate panels 75x50cm, for GS, SG and DH.

Training panels (non FIS-homologated) 75x50cm for GS, SG and DH.

Kids size panels 55x40cm.

All panels available in any of our three print methods.

Panels are made from heavy duty mesh fabric that lets wind through. Attaches to poles with elastic Bungee cords.

No order minimums.

Print methods

1. One-color screen print on one side. Panels made in one of the nine standard colors (see #PA512).
2. One-layer panels made from extra heavy duty mesh fabric. These panels are digitally printed from both sides, back side appearing mirrored. Can contain any graphics and unlimited colors (see #PAZ513D).
3. Two-layer panels made from mesh fabric. Both sides digitally printed and appear correct. Can contain any graphics and unlimited colors (see #PA513DD).

All panels with reinforcement edge band at upper and lower edge, in any of the standard colors.

EO31 - orange edge protector for 31mm poles.

30cm inside reinforcement tube. Not sold separate.

XB - XBase Heavy duty brush base.

For 40-41mm Ø holes. Only 28cm long.

RRS31 - 31mm, 177cm reinforced replacement shaft. Available in red, blue orange and bright green.

TCH27 - 27mm end plug.

POS27F:XB - 27 mm FIS plastic hinge flex slalom pole with shaft reinforcement and XBase. Available in red, blue, orange and bright green.

FSA27 - Flex to 27mm shaft adapter for 27mm poles.

XP-FLEX - plastic slalom pole hinge that fits 31, 27 & 25mm slalom poles.

RRS27 - 27mm, 167cm reinforced replacement shaft. Available in red, blue orange and bright green.

PC215/31W - Stiff None-FIS 31mm Ø 215cm long None-turning PC-pole with ribbed 40mm Ø hose base. For GS, SG & DH.

Light weight and wind resistant. Available in red, blue, orange and bright green.

Cut30 - 30cm long ribbed hose. 40mm Ø, same as XBase.

Beyond-X offers a wide range of quality slalom poles. In addition to FIS standard red and blue shafts, the FIS fluorescent orange for speed events, and none-FIS bright green, for training are available. All hinged red, blue and orange 31 & 27mm slalom poles are FIS-approved. Poles on page 38 include our newly developed plastic hinge, and an inside top 30cm shaft re-enforcement. 31 & 27mm poles on page 39 use SNO31 and SNO27 metal hinges.

Our XBase Lite and heavy duty XBase brush bases are massive time savers in course setting and pulling, as well as limit course maintenance. They function in almost all snow conditions and require no other tool than a power drill machine and a drill bit. The Bases are only 28cm long and can be used in indoor ski halls and in thinner snow covers. They work so well, that our competitors have unsuccessfully attempted to prevent us from selling them!

Slalom poles faces some of the toughest environments plastics can manage. Our ongoing goal is to always continue our improvement work, with-in financial reason, of course.

All components, except shaft reinforcement, are available as spare parts.

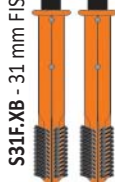

TCH31 - 31mm end plug.

TCH27 - 27mm end plug.

SNO31 - 31mm metal hinge. Fits 31 & 25mm poles.

EP31 - 31mm Edge protector

S31F.XB - 31 mm FIS slalom pole with 177 cm PC-shaft, SNO31 metal hinge and XBase.

SNO27 - 27mm metal hinge. Fits 27mm poles.

EP27 - 27mm Edge protector.

S27F.XB - 27 mm FIS slalom pole with 177 cm PC-shaft, SNO27 metal hinge and XBase.

XBL - XBase Lite brush base. For 40-41mmø holes. Only 28cm long.

EP25 - 25mm Edge protector.

PS25F.XBL - 25 mm slalom pole with 150 cm PC-shaft, SNO31 metal hinge and XBase Lite.

RS25 - 25mm, 150cm replacement shaft. Available in red & blue.

RRS31 - 31mm, 177cm replacement shaft. Available in red & blue.

RS27 - 27mm, 177cm replacement shaft. Available in red & blue.

The offering of additional turning aids, for ski clubs and ski area needs, is also extensive. And fills the needs for other activities like cross-country skiing, winter car testing tracks, and for marking of loading area for chair lifts.

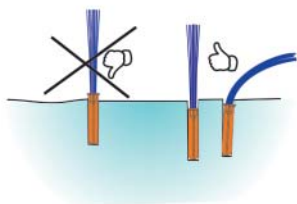

And there is a range of very functional carrying bags for slalom poles and turning aids.

BM25W - 25cm long brush gate in red, blue, green or pink. With 40mm \varnothing ribbed hose, giving the same base \varnothing as XBase, helps the brush gate to stay put. Versatile turning aid for racers as well as ski school use.

BM25 - 25cm long turning aid in red, blue, green and pink. 30mm \varnothing base.

#LU50, Brush gate turning aid practical storage and carrying bag that can be hung from the belt. Holds 15-20 brush gates.

QClip80, 8mm 80cm long red elastic slalom pole bundle strap. Quick, easy and flexible bundling aid.

LU40, slalom pole carrying bag with heavy shoulder strap. Holds 25 poles.

KFHP 50 - Simple hinged 31mm \varnothing , 50cm Kick-Flag PC-pole with 30cm long shaft part below the hinge. In red or blue.

ST40FW - Hinged 31mm \varnothing , 40cm Kick-Flag PC-pole with 30cm long ribbed hose base. In red or blue.

Cut15 - 15cm long ribbed hose that fits on to 30-31 mm poles PC-shafts.

PC160/31W - 31mm, 160cm SkiCross none turning pole, with 30cm ribbed hose. Available in red or blue.

#ST40FXBL, 40cm hinged, hard SL Stubbie with 40cm stiff 31mm Ø PC shaft, and XBase Lite Brush base. Preferred by many ski academies, since it won't wrap around leg.

ST60-SSHb - 60cm (above snow) soft SL Stubbie with 15cm ribbed hose base. Available in red or blue. Cost less, and saves tubes.

RS85 - 85cm replacement hose for ST60-SSHb. Red or blue.

ST60XBL - 60cm soft SL Stubbie with XBase Lite brush base. Available in red or blue.

RS60 - 60cm replacement tube for ST60XBL. In red or blue.

ST40-SSHb - 40cm (above snow) Soft SL Stubbie with 15cm ribbed hose. Available in red or blue. Costs less and saves tubes.

RS65 - 65cm replacement tube for ST40-SSHb. In red or blue.

ST40XBL - 40cm soft SL stubbie with XBase Lite brush base. Available in red or blue.

RS40 - 40cm Replacement tube for ST60XBL. In red or blue.

#STUMPIE turning aid, 80cm long soft mesh tube with a smart and simple, the worlds first, brush base for skiing. Very light weight. Perfect for ski school activities, as well as for more hard-core race training. Even national teams use these. Available in green, blue and red.

If needed the brush could easily be transferred to a replacement tube.

#STUMPIE Tube. Replacement tube.

#LU61, Stubbie carrying bag that can be carried like a backpack. Holds 30 Stubbies.

Slalom pole custom prints

Since we sell a few poles, at times it can get hard to keep track of ones poles.

To solve this, we offer custom one-color logo prints, at reasonable cost, on our poles. These are available only on orders being shipped out of our Polish factory.

The prints are available in six different colors and require a 60 shaft minimum order.

Prints can be up to 50cm long, and consist of 1, 2 or even three prints around the shaft.

Print option is available on slalom poles, delimiting poles, B-net poles, and on C-net and sign poles.

	White
	Silver
	Gold
	Yellow
	Orange
	Black

215/310R80 - 215cm long 31mm Ø blue, red, green or black delimiting pole, with 80cm sharp orange top and 5cm reflex.

215/310R30 - 215cm long 31mm Ø blue, red, green or black delimiting pole, with 30cm sharp orange top and 5cm reflex.

We produce delimiting poles out of very durable Polycarbonate (PC), with bottom cut at an angle. Available in different colors, with bright durable orange 30 or 80cm long film, and 5cm wide reflex for better night visibility.

PC215/31 - 215cm long 31mm Ø blue, red, or orange PC-pole.

PC215/31FY - 215cm long 31mm Ø Fluorescent yellow & black caution pole.

PC215/31FYOR - 215cm long 31mm Ø Fluorescent yellow & black caution pole, with 30cm sharp orange top.

PC200/25FY - 200cm long 25mm Ø Fluorescent yellow & black caution pole.

Milwaukee 18V Switch tank 18V. A powerful easy to use sprayer that is powered by the same 18V batteries used with Milwaukee power drill machines.

With removable/exchangeable tank, and heavy-duty harness and hip strap. Includes tank, harness, battery and charger.

Blue, red or green color pigment powder **PB1000**. 1 kg pigment powder mixed with water and anti-freeze will be enough for 1000L. This pigment is harmless and used in the food industry.

#Milwaukee M18 ONEDD 2-502x FUEL

5A, 18V heavy duty brushless power drill machine with 13mm metal chuck. 2 gears, 0-2000 rpm – incredible 135Nm (please note that other very similar Milwaukee models offer less than half of this), electronic clutch with 13 torque settings. 2,5 Kg, 2 batteries and charger.

Connect via Bluetooth with Milwaukee ONE-KEY app. Complete tool customization via ONE-KEY, control speed, torque, start & end speed, anti-kickback functions and LED.

Metal drill bits with 2 hard metal points and triangular shank.

50cm length, 12mm shank.

#41265, 19mm drill bit (for fence fiberglass poles).

#SLO32, 32mm drill bit (for 31mm fence poles).

#SLO35, 35mm drill bit (for B-net poles).

#SLO38, 38mm drill bit.

#SLO41, 41mm drill bit (for XBase).

#SLO41/24, 41mm drill bit with high blockage (for indoor ski hall use).

#SLO45, 45mm drill bit.

Milwaukee M18
ONEDD 2-502x FUEL

Aluminum drill bits

The future has arrived! Constructed of a special airplane Aluminum/Cooper alloy this drill bit weighs in at half the weight of a traditional steel drill bit, yet is as strong!

It comes with a 12mm triangular shank, and 50cm length. With two exchangeable hard metal points, that is slightly angled for maximum bite also on the hardest of ice. The used "Helix angle" ensures optimal transportation efficiency of snow and ice up and out of the hole. And it comes in really cool colors!

#ALU32, 32mm Yellow drill bit for 31mm fence poles.

#ALU35, 35mm Red drill bit for B-net poles.

#ALU38, 38mm Blue drill bit.

#ALU40, 40mm Purple drill bit for XBase.

#ALU32-35R, replacement hard metal points for 32 & 35mm drill bits.

#ALU38-40R, replacement hard metal points for 38 & 40mm drill bits.

Milwaukee warranty

2 year warranty on all Milwaukee machines and batteries, extended to 3 years if machine is registered on to Milwaukee's Internet site.

OrangeFox

The plastic drill bit that revolutionized course setting. Extremely light weight with exchangeable and rotating hard metal points.

Launch
pads

#41695, Heavy rubber 33x33cm launch pads. Easy to install, without need to water down. Eliminate developing of holes, where ski poles can get stuck.

#JON, heavy duty Aluminum snow shaper/shovel.

#TM15, 15m
measure tape.

#TM30, 30m
measure tape.

#AB500, 2-way stretch heavy duty 8cm wide, digital printed FIS-standard arm/leg-band. Will not fold or wrinkle.

#BA510, same as above, but with added adjustable Velcro closure.

#AB500

#SL35R

#SL30R

#SL30T

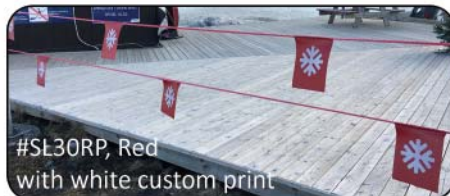

#SL35R 30m long signal lint of 10mm Black/Yellow rope and 12x16cm rectangular flags in printed checkered yellow/Black PVC-fabric, spaced 1.5m apart.

#SL30R 30m long signal lint of 10mm Black/Yellow rope and 20x26cm rectangular flags in printed checkered yellow/Black PVC-fabric, spaced 1.5m apart.

#SL30T 30m long signal lint of 10mm red rope and triangular 21x32cm flags in red, blue and yellow PVC-fabric, spaced 1.5m apart.

#SL30RP 30m long signal lint of 10mm Black/Yellow, red or blue rope, with custom printed 20x26cm rectangular flags in PVC-fabric, spaced 1.5m apart.

#SL30RP, Red
with white custom print

#SL30R

#RCP13 Radio Chest Pack. With one angled, adjustable radio bay that fit most Com-radio sizes. Equipped with two pockets and a pen loop. Adjustable shoulder and chest straps.

#RCP13

#RCP13b Radio Chest Pack. Same as RCP13 but with custom print on main pocket lid.

#RCP11 Radio Chest Pack. With two adjustable, angled radio bays that fit most Com-radio sizes. Equipped with one large pocket and a pen loop. Adjustable shoulder and chest straps.

#RCP11

#RCP12

#RCP12 Radio Shoulder Sling. With one adjustable radio bay that fits most Com-radio sizes. Adjustable straps.

#LU74

We grew tired of selling coaches backpacks where seams started to tear after only a few months of use. So we decided to use some capacity of our factory, to take care of this matter.

We have developed a small collection of four backpacks for various purposes. They are all very Heavy Duty, made to last. Made from PU-coated polyester weave with bottom waterproof reinforcement fabric (not LU75). Heavy duty carrying straps, and zippers. Padded back and bottom with hard plastic back inlay (not LU75).

Coaches backpacks equipped with lots of functional pockets for equipment like drill bits and drill machines. The many pockets make it easy to separate necessities and keep them organized.

Our boot bag and the smaller all-round backpack made from same heavy duty materials.

#LU71

#LU71 Large Coaches Backpack

80 liter backpack with main compartment and another 11 compartments, for various purposes.

#LU74b

#LU74 Coaches Backpack

57 liter backpack with main compartment and another 11 compartments, for various purposes.

#LU74b

Same as LU74, but with lower panel custom printed.

#LU75 Universal Backpack

29 liter backpack with main compartment and another 3 compartments, plus 2 outside elastic mesh pockets.

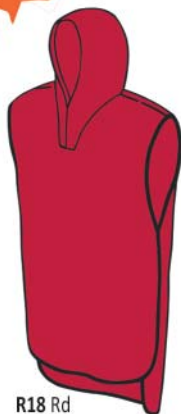

#LU75

#LU80 Boot bag

50 liter boot bag with large main compartment and another 9 compartments.

#LU80

**R18 Rd**

R18 Oversize Poncho with hood. Sides are joined via push buttons. Non breathable fully waterproof fabric. Available in red and royal blue. Sizes: XXS-XXL.

**R21 Ry**

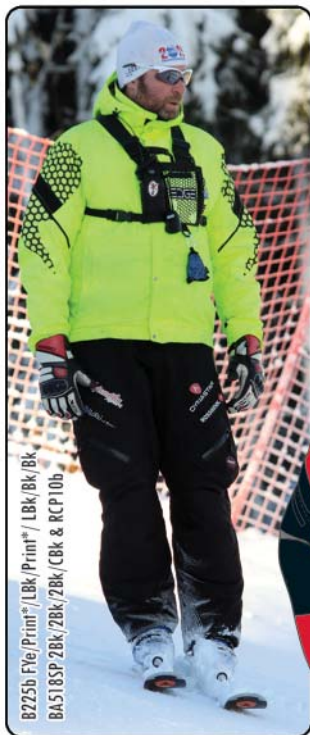

R21 Oversize rain coat with hood and two side pockets. Non breathable fully waterproof fabric. Available in red and royal blue. Sizes: XXS-XXL.

**R21b Print**

R21b. This is a fully printed version of our R21 oversize rain coat made out of 2-ply woven fabric and lined. 2 side pockets and permanent hood. The bottom can be shortened by turning fabric inwards and securing with snap buttons. Sizes XXS-XXL.

**R46b Print**

R46b. Fully loaded coached coat. Same functions as R36, but fully custom printed. Sizes XXS-XXL.

BA518SP Coaches Waist Pant. Our popular Coaches waist pant is as good as they come, with re-enforced knee and seat areas, cargo pockets and SoftShell waist area. This same pant is also used in the official Swedish and Norwegian Ski Patrol uniforms. Available in sizes XS-XXL, where S-XL also can be ordered with 5cm longer or shorter leg-length.

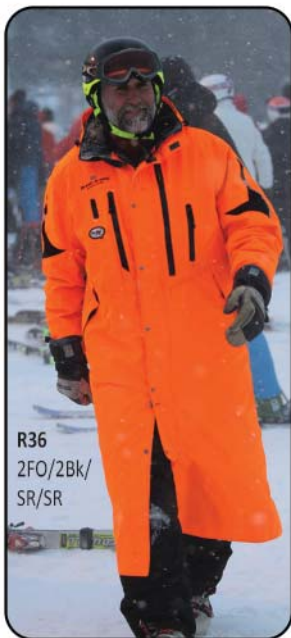

**#BA519SP**
2Rd/2Bk/2CG/CBk

B299. Optional suspenders.

#BA518SP
2FG/2Bk/2FG/CBk

BA519SP High bib coaches pant with suspenders. Otherwise same as BA518SP.

**BF50b Print/2Bk**
BA518SP 2Bk/2Bk/2Bk/CBk

R36
2FO/2Bk/
SR/SR

R38 2Bk/Wh/Wh

R37
2Rd/2RB/Wh

R36 Coaches coat loaded with chest, radio, back, phone, goggle and side pockets. More pockets than one ever needs. Removable insulated liner makes it perfect for very cold winter days, as well as for the glacier in spring, summer or fall. Optional snap-on hood can be snapped on to collar. Sizes: XS-XXL.

R38 Permanent insulated, simplified version of R36. Offers two side pockets, one chest and one goggle pocket. Sizes: XXS-XXL.

R37 Oversize foul weather coat that fits over regular outerwear. Includes hood, 3 chest pockets, and offers inwards snap-up bottom, to reduce the length. Sizes: XXS-XXL.

BA518SPb, digitally printed version of BA518SP Coaces waist pant.

BA519SPb, digitally printed version of BA519SP High bib Coaces pant.

B-net clamp

B-net hook

#PC250/35, 250cm long 35mm Ø red or blue PC B-net pole to be used with 2m high B-net.

#PC180/35, 180cm long 35mm Ø red or blue PC B-net pole to be used with 1.3m high B-net.

#PC160/35, 160cm long 35mm Ø red or blue PC B-net pole to be used with 0.4m high B-net.

Security surrounding competition events, or ski areas in general, are becoming increasingly important. B-net is the most common and flexible safety netting solution. Only in extreme cases will the heavier so called A-net be required to achieve proper safety standard.

Beyond-X offers a wide range of Polyethylene high tenacity, highly UV-resistant red or blue B-net to fill different needs. All assembled, or sold as separate parts to assemble yourself, or to re-supply on components.

#B-net2x20

2m high and 20m long, with 3.5mm cord and 5x5cm mesh.

#B-net2x20.P11

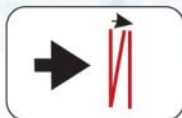

Same as above, but fully assembled with 11 pieces of 2.5m long B-net poles, containing 2 B-net hooks each.

#NRW01

Manual B & C-net roll-up-device. Saves lots of time and results in tight rolled up net. Can be lifted by means of fork lift.

>2.1 m

<0,5 m

Correct mounting of parallel mounted B-net, according to FIS-recommendations. Depending on conditions, sometimes 2 or even 3 parallel mounted B-net may be required.

#NRW01

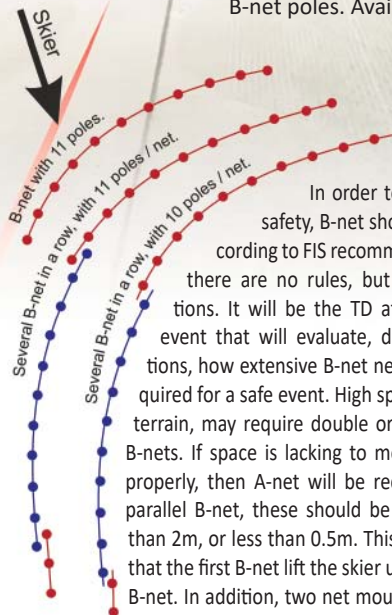

Manual net roll-up-device.

#B-net 2x20.L6

#B-net 2x6.P6

Lift tower safety B-net, 2m high, 6m long, with 3.5mm cord and 5x5cm mesh. Complete assembled with 6 B-net poles. Available in red or blue.

In order to achieve maximum safety, B-net should be mounted according to FIS recommendations. Note there are no rules, but only recommendations. It will be the TD at every competition event that will evaluate, depending on conditions, how extensive B-net netting that will be required for a safe event. High speeds, or challenging terrain, may require double or even triple parallel B-nets. If space is lacking to mount required B-net properly, then A-net will be required. In cases with parallel B-net, these should be separated by more than 2m, or less than 0.5m. This in order to prevent that the first B-net lift the skier up over the following B-net. In addition, two net mounted in a row needs to overlap each other, like fish scales, to prevent skiers to pass between the two B-net.

#B-net 2x20.L6

#B-net 0.4x25

#B-net 0.4x25

40cm high and 25m long, red or blue B-net, with 3.5mm cord and 10x10cm mesh. Preferably mounted on #PC160/35 fence poles.

#B-net 1.3x15

1.3m high, 15m long, B-net, with 3.5mm cord and 5x5cm mesh. Available in red or blue.

#B-net 1.3x15.L8

Same as above, but completely assembled with 8 pieces of 180cm long B-net poles.

Additional B-net:

We are able to, on special request, offer B-net in different heights up to 2m, as well as with 5x5, 7x7 or 10x10cm mesh openings. These are outside of standard sizes, and require longer lead times. Contact us for more information.

A-netting:

On special request, we are able to provide A-net as well. These however are outside our standard offering, and will require some lead time. Contact us for more information.

#B-net pallet

Galvanized stackable transport and storage pallet. Suitable for both B- & C-net. Fits 13 complete B-nets and can be stacked 2 or 3 pallets high for efficient and airy storing. Width 120cm, length 150cm and height 133cm.

**#B-net pallet****Name tags**

Digital sublimation printed name tags with sewn border and Velcro hook backing.

Custom printed with unlimited number of colors, in different sizes and with no order minimums.

#NT4x9.5

4x9.5cm fabric name tag.

Safety mattresses

It all again began with repeated customer questions, if we would be able to produce safety mattresses? Followed by several improvement suggestions. Since we, in 2018, started producing these, order quantities have increased every season. We must be doing something right. A better product!

Our safety mattresses use close-cell tube foam in 4cm layers. Great chock absorbtion, light weight, and easy to form to towers, posts and other objects that need to be covered. In red and blue our mattresses are available in rugh surface anti-slip PVC-fabric with extra high UV-fading resistance.

Since investing in our own in-house HF-welding machine, we have been free to experiment and develop other products as well, without being restricted by production order minimums. After again, customer requests, we started producing snow making Hydrant cover, in different sizes. We learned that one problem was the constant removal and re-installation, that quickly damaged the covers. So, for one particular size, we developed a Hydrant cover with window opening, that allowed access without removing the entire Hydrant cover.

Hydrant covers are produced with standard 4cm close-cell foam (not the tube foam), available in red or blue.

And we do produce custom size Hydrant covers.

Hydrant Covers

Standard Hydrant cover sizes:

- #HC W80xH105-4cm
- #HC W80xH200-4cm
- #HC W100xH120-4cm
- #HC W115xH105-4cm
- #HC W130xH175-4cm
- #HC W140x105-4cm

HCO W130xH105-04

SM1.5x2-08

Anti-slip fabric

Beyond-X safety mattresses are produced in red or blue UV-fading resistant, anti-slip surface fabric. Without anti-slip surface, also available in a number of additional colors.

We use special 4cm light weight, close-cell, tube foam, highly shock absorbing, and easy to shape around objects. Standard mattresses use 2 layers, 8cm total thickness. 4cm or 12mm thickness could also be produced.

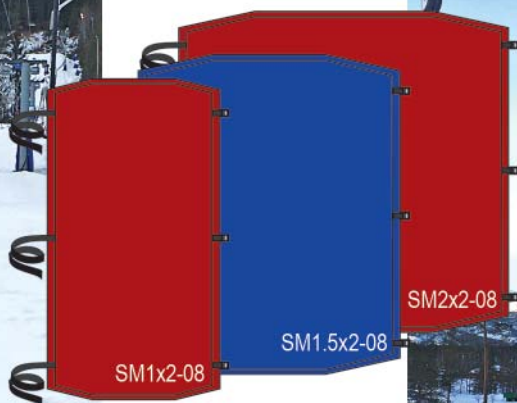

Close-cell tube foam.

Standard size safety mattresses:

- #SM1x2-08, 1x2m, 8cm thick mattress
- #SM1.5x2-08, 1.5x2m, 8cm thick mattress
- #SM2x2-08, 2x2m, 8cm thick mattress
- #SM2.5x2-08, 2.5x2m, 8cm thick mattress
- #SM3x2-08, 3x2m, 8cm thick mattress
- #SM3.5x2-08, 3.5x2m, 8cm thick mattress
- #SM4x2-08, 4x2m, 8cm thick mattress

Yellow mattresses

Corners are slightly angled to simplify mounting.

Standard mattresses are equipped with three 5cm wide webbing straps and heavy duty Acetal plastic buckles. We can however also offer traditional fixation system with grommets, elastic cord and metal hooks.

If a mattress cover become damaged it can be replaced, re-using the foam. With an inside zipper mattress can be opened and foam removed and inserted into a new mattress cover.

Fixation via heavy webbing straps and Acetal buckle.

Fixation via grommets, elastic cord and metal hooks.

We also offer custom size safety mattresses.

#SM2x3.5-08
3.5m wide red safety mattresses at a soccer field.

SM2x2-08

With digital UV-printing, we are able to offer partial, or fully custom printed safety mattresses. This type of printing can also be applied to uneven surfaces as our anti-slip safety mattress surface.

This opens for integrating safety mattresses into a specific arena look.

For instance, in a Kids ski area playground, or a mountain bike track, where one doesn't like to place red or blue mattresses in the forest.

Perhaps printing sponsor logos on to mattresses, can turn the cost of buying mattresses, instead into a source of income!

We produce custom pre-shaped post or tower safety mattresses, in regular (none anti-slip) PVC-fabric, with our tubular close-cell mattress foam, to fit the size of the object needing protection applied in 4, 8 or 12cm thickness. We offer choice of closure by Velcro, or elastic cord with hooks and grommets. Can be produced in different colors.

Uniform requirements for ski area personal, differ greatly depending on where and how the garments are to be used.

Beyond-X offers a wide range of different styles, from heavy duty workwear for ski patrol, snow making or lift service, lighter ski workwear for lift attendants, too functional skiwear for ski schools.

All ski jackets and pants can be ordered with, or without insulation.

A uniform can consist of many different styles, but still be colored to achieve a unified look.

Garments can be re-ordered, without minimum order quantities, several times / year, and a minimum of 3 years. Often over 5 years. This enables keeping uniforms complete and increasing uniform life-span an additional 1-2 seasons.

#BA586 Heavy-duty Cordura shell tool vest. Designed to carry lots of tools when climbing up lift towers. Packed with allot of functional pockets, as well as radio holder. Red or black. Sizes S-XXL.

SX420

We are a proud supplier of the Swedish and Norwegian official Ski Patrol uniforms. Assisted by ski patrol workers, these have been developed with the goal to produce the best possible ski patrol work wear.

These uniforms can be ordered in own color combinations, with or without insulation. SoftShell jackets and vests can be ordered in matching colors. We also offer a Ski-cross vest printed to match the ski patrol uniform design.

These uniforms are produced several times every season, and can be re-ordered, without minimums for a minimum of 5 years.

Plastic Signs

Below find some examples of signs we have produced in different shapes, sizes and colors, with different print designs.

We recently invested in a large size UV-printer, in that enables us to print directly on to safety mattresses. This printer is equally capable of printing directly on to PETG sign material. And since we deal with Ski Area Supply products, a natural step was to start producing digital printed plastic signs.

Metal signs may be durable. They are however expensive, heavy, and rather dangerous to collide with. On top of that, their sign brackets, not seldom, cost as much as the sign itself.

We went about and developed a cost efficient sign bracket, based on our B-net hook design, for easy and quick mounting on to signs, and then on to 35mm Ø PC poles (B-net poles) that are very durable, yet light weight and very impact absorbing.

Then we choose to print on to flexible yet durable, also in cold temperatures, PETG sheets. With this super flexible UV-printer, you can print the signs with anything you can print on your standard computer printer, without order minimum requirements.

The signs are laminated with a scratch and UV-light fading protective film, before being laser cut to its final shape and size. We tend to cut with rounded corners, to avoid sharp points.

Our signs are available with required number of mounting brackets, for mounting on to 35mm Ø PC-poles, or without, for wall mounting.

With this set-up, we are not limited to a number of standard designs, but free to create whatever our customers ask for.

Sign brackets #SIGNHC mounted with blind-rivets on to sign, and then locked on to PC-pole with locking lever.

We offer 35mm Ø sign mounting PC-poles in a range of colors and lengths.

In order to prevent the signs from rotating, we suggest adding a B-net hook on to pole, at snow level. This one will dig in to the snow, and prevent rotation.

1x1m signs are the largest we recommend for pole mounting.

Ski area trail map sign we can produce in up to maximum 200x120cm size. And then only suitable for wall mounting.

#FUN70, fabric/foam custom printable, 1m long, pole cover, fits on to 35mm Ø PC-poles.

#PC160/35, PC-pole with mounted B-net hook at snow surface that effectively prevents the sign from rotating in the snow.

#PC160/35, 160cm long PC-pole, available in red, blue or green.

#PC180/35S, 180cm long PC-pole, available in red, blue or green.

#PC250/35S, 250cm long PC B-net pole, available in red and blue.

We were primarily a ski wear manufacturer. Over the years though our customers, knowing that we own and run our own factory, with a wide range of machinery, have been looking at us for possible solutions to problems they faced.

Over time, we have evolved in to a ski area utility product manufacturer. And thanks to our printing capability, we have become a sort of advertising agency, with the difference that we print on utility products.

Our extremely functional and good looking info and advertising gate panels, with a sewn in upper fiberglass rod that prevents them from hanging, are mounted with elastic Bungee cord on to 215cm long PC-poles, and available in different shapes and sizes, printed from one side, or both sides, single fabric layer version showing back side mirrored, while both sides correctly turned on the two fabric layer version. These are offered with no minimum order requirements, and short lead times.

During the pandemic, that created a sudden need and requirements, resulted in massive orders. What is displayed on this page, are only a few examples of prints we have produced.

CZ551D, One fabric layer caution panel 95x115cm, printed from both sides, back side mirrored. Preferably mounted on two PC215/31 poles.

C551DD, Two fabric layer caution panel 95x115cm, printed correctly from both sides. Preferably mounted on two PC215/31 poles.

SF561D, One fabric layer Start/Finish panel 70x170cm, printed from both sides, with back side mirrored. Preferably mounted on two PC215/31 poles.

SF561DD, Two fabric layer Start/Finish panel 70x170cm, printed correctly from both sides. Preferably mounted on two PC215/31 poles.

SP580D, One fabric layer Sign panel 150x145cm. Printed on front side. Preferably mounted on two PC215/31 poles.

SFZ561D & SF561DD

**DIGITAL PRINTED
C-NET**

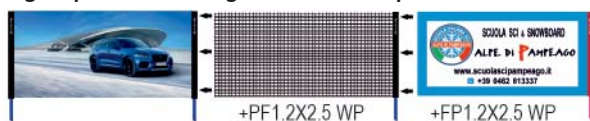

Digital printed C-net have over just a few years, become very popular, due to their versatility, were they may be used as advertizing banners, information signs, or as caution panels to warn about potential dangers.

Or simply being used as C-net offering a unique custom look, that may coral events, or event arenas.

If used for advertisement these net can turn the cost for acquiring C-net, in to a source of income! And digital printed C-net can, if the design allows, look stunning! Every design that can be printed on a home computer printer can also be printed on these C-net.

Both sides are printed and equally bright. However, the back side will appear mirrored.

Digital printed 1.2m high C-net with PC poles:

FP1.2+L2.5 WP - Fully printed 1.2x2.5m net section with pole tunnels and PC-poles.

+PF1.2x2.5 WP - Add-on unprinted 1.2x2.5m Polyfence section, with pole tunnel and PC-pole.

+FP1.2x2.5 WP - Add-on fully printed 1.2x2.5m net section, with pole tunnel and PC-pole.

Digital printed 0,6m high C-net with PC poles:

FP0.6+L2.5 WP - Fully printed 0.6x2.5m net section with pole tunnels and PC-poles.

+PF0.6x2.5 WP - Add-on unprinted 0.6x2.5m Polyfence section, with pole tunnel and PC-pole.

+FP0.6x2.5 WP - Add-on fully printed 0.6x2.5m net section, with pole tunnel and PC-pole.

Fully printed 0,35m high C-net with PC poles:

FP0.35+L2.5 WP - Fully printed 0.35x2.5m net section with pole tunnels and PC-poles.

+FP0.35x2.5 WP - Add-on fully printed 0.35x2.5m net section, with pole tunnel and PC-pole.

A complete C-net can include none printed Polyfence net sections and printed 2.5m long sections, freely placed according to customers wish.

Net sections are joined by a net pole tunnel in durable PVC-fabric, and 35mm Ø PC-pole. Such poles (essentially B-net poles) offer stability, yet will flex if skied in too. Will dampen the winds force, and will aid in keeping these net nicely stretched and great looking.

We produce these in up to 25m lengths. And also the printed sections allow wind to pass through.

Standard net heights are 35cm, 60cm and 120cm. On special request we have produced 80cm and 100cm heights as well.

None printed net sections use red, blue or black 1x1cm mesh Polyfence.

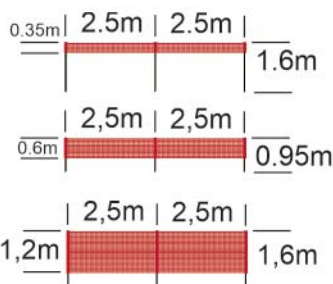

Or 6x4cm mesh Snowfence.

In the summertime, if permitted, these net can be mounted by simply drilling mounting holes in to the ground, like on snow.

Correct C-net mounting

A nicely stretched net, is also a correct mounted net! Our Ø35mm PC-poles elasticity greatly aids in achieving this. Simply drill a 35mm Ø hole at a 3-7° angle away from the net section, and then stretch the net to be able to insert the pole in to the hole. The pole will then act as a spring that stretches the net.

DIGITAL PRINTED
C-NET

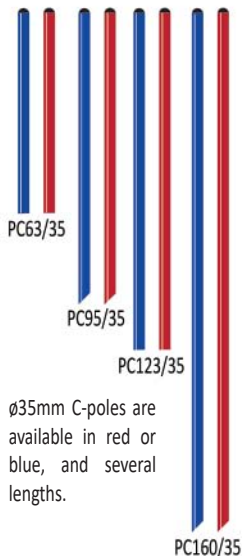

On demand, when very long logos need to be printed, we can produce 5 or up to 7.5m long continues printed net sections, without the interruption of pole tunnels. In these cases, the net tunnel will instead be sewn in the same place, but only on to the back side of the net, and in net mesh net fabric.

MP1700 Steel platform

Black triangular 17kg heavy, 50cm wide steel platform, used for setting up our C-net on flat surfaces where drilling holes is not permitted. To be used with our Ø35mm PC-poles.

ø35mm C-poles are available in red or blue, and several lengths.

PC63/35, 63cm long pole for mounting 60cm high net, on MP1700 Steel platform.

PC95/35, 95cm long pole for mounting 60cm high C-net in snow.

PC123/35, 123cm long pole for mounting 120cm high net, on MP1700 Steel platform.

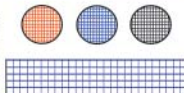

PC160/35, 160cm long pole for mounting 120cm high C-net in snow.

Pole tunnels sewn in PVC-coated fabric are available in black, red, blue, white, yellow, green or orange.

ZipOn digital printed C-net

ZPF1.2/L2.5 - Zip-on unprinted standard color 1,2m high x 2,5m long C-net section

ZPF0.6/L2.5 - Zip-on unprinted standard color 0,6m high x 2,5m long C-net section.

ZPF1.2/L2.5 - Zip-on fully printed 1,2m high x 2,5m long section.

ZPF0.6/L2.5 - Zip-on fully printed 0,6m high x 2,5m long section.

Zip-on Digital printed C-net

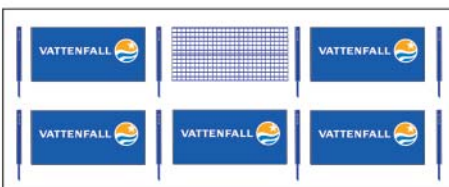

Our Zip-on C-net system joins net sections to pole tunnels by means of a coil zipper. This enables rearranging of net sections, replacement of a section if needed, as well as assembly of net to any desired length. Ideal for event organizers that use many differently printed sections at different event. Each Zip-on section is 2.5m long. Back of section will be shown mirrored.

Zip-on tunnels:

ZFT1.2/1.6 - Zip-on pole tunnel 1,2m high with two zippers and a 1.6m long PC-pole.

ZFT0.6/1.6 - Zip-on pole tunnel 0.6m high with two zippers and a 1.6m long PC-pole.

ZFT0.6/0.9 - Zip-on pole tunnel 0.6m high with two zippers and a 0.9m long PC-pole.

Zip-on tunnels to be used with #MP1700 Steel Platform:

ZFT1.2/1.23 - Zip-on pole tunnel 1,2m high with two zippers and a 1.23m long PC-pole.

ZFT0.6/0.63 - Zip-on pole tunnel 0.6m high with two zippers and a 0.63m long PC-pole.

POLYFENCE

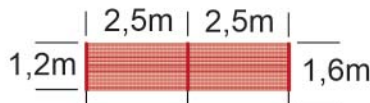

Our POLYFENCE net has 1x1cm mesh that lets wind through, but prevent poles and boot buckles from getting caught. That makes them ideal for lift lines. Reinforced at upper and lower edge. In black, blue and red.

As standard, these nets are made with pole tunnels in matching color, but can be customized with tunnel color of choice and/or screen printed tunnel logo. POLYFENCE is the net mostly used in our partially printed nets.

Beyond-X C-net can be ordered in different heights, lengths, colors and mesh size. You can order them on roll, net on roll with sewn on pole tunnels or as a complete net, on roll, with poles in the sewn on pole tunnels. All our C-nets with 35mm PC-poles can also be mounted on our Mp2000 Steel platform.

25m C1.2+L25 NP

Complete with 160cm PC-poles every 2.5m inside sewn tunnels

25m C1.2+L25 WP

We offer a wide selection of poles for great mounting of C-nets. The trend is that 35mm PC poles are taking over (from fiberglass poles). They are more heavy duty, stick better in the snow and leave no glass sticks. But for summer use, fiberglass still might be preferred.

#FG162H, 162cm long fiberglass pole with metal point and two permanent hooks (for nets without sewn tunnels).

#FG95, 95cm long fiberglass pole with metal point and top (for nets with tunnels, or with #EW19 hooks).

#FG162, 162cm long fiberglass pole with metal point and top (for nets with tunnels, or with #EW19 hooks).

#PC63/35, 63cm long 35mm PC pole. For 60cm high net with sewn tunnels and metal platform #MP2000.

#PC95/35, 95cm long 35mm PC pole. For 60cm high net with sewn tunnels, mounted in ground drill holes.

#PC123/35, 123cm long 35mm PC pole. For 120cm high net with sewn tunnels and metal platform #MP2000.

#PC160/35, 160cm long 35mm PC pole. For 120cm high net with sewn tunnels, mounted in ground drill holes.

#PC160/31, 160 cm long 31mm PC poles. For mounting with C-net hook.

SNOWFENCE

Red/Yellow

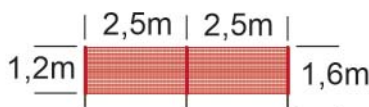

Blue

Blue/Yellow

Our SNOWFENCE nets has 6x5cm mesh, that easily lets wind and snow through. A good all-round-net. Reinforced at upper and lower edge. Available in Blue, red/yellow and blue/yellow.

Possible to customize with tunnel color of choice. Also possible to screen print logo on tunnels.

Digital printed Beach Flags in different shapes and sizes, as well as different bases. A complete beach flag requires flag, antenna and a foot / anchor.

F560 Composite Antenna XL

Fits all size XL flags.

F430 Composite Antenna L

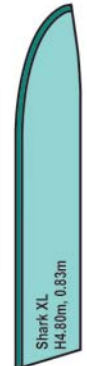

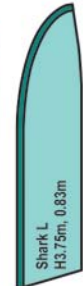

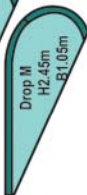

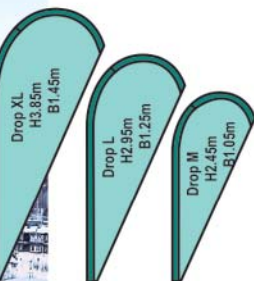

Fits all size L flags.

F360 Composite Antenna M

Fits all size M flags.

F290 Composite Antenna S

Fits all size S flags.

Digital printed banners

Made of the same fabric as being used for digital printed C-net. But here printed only from one side. The fabric allows wind to pass through. The banners are equipped with metal grommets. Maximum height 1.45m and up to 100m in length. Pricing/m2.

1.45x5m banner attached to B-net with elastic loops.

Elastic Loop 20cm

For simple mounting of banners on, for example B-nets.

Beyond-X has evolved into being almost an advertising agency for the alpine skiing sport. With the great difference that we print on utility products, that are needed to run competition events.

We offer a large range of products, that are suitable for ski competition arena building. Such as race bibs, gate panels, slalom poles, beach flags, safety mattresses, banners, advertising and safety netting.

All is digital printed, requires no minimum orders. Perfect for large, as well as smaller event.

This page only shows a few examples of what has been recently produced.

Beyond-X FUNSKI Kids ski area playground products is a segment under rapid growth.

The demand for affordable products is large. Most items can be digitally custom printed, which makes them even more attractive.

Our offering includes many different shaped foam core shapes, covered with printed fabric covers in either Polyester, or extremely durable PVC-fabric.

They can be used as turning aids, lift or arena entrance arches, as information signs, or just for Fun!

FUNSKI

Kids stuff

Add to this our digital printed C-net in different heights, to attractively enclose a playground, or direct visitors. Also, stobbies, brush gates and arches.

Our customers are our product developers, that come up with new ideas that we try to develop into actual products. This is an ongoing process.

#FUN20, 100cm high, 60cm wide and 10cm thick figure, that can be mounted by choice of two #ST40SSHB stobbies, or two #PC80/31W, that need to be ordered separately.

Also available in PVC-fabric as **#FUN20PVC**.

FUNSKI

Kids stuff

#FUN57 High-Five hand in PVC-fabric. 33cm long, 22cm high and 10cm thick with a foam core. Mounted on hinged pole. Complete with all that's needed for mounting on a tree or wooden post.

In Scandinavia, for many years, a lady has been producing very popular 3D fabric turning aid figures. Now that she retired, many have asked us if we could produce such figures? We have decided to invest in needed

#SL30 Signal lint. 12mm thick 80m long rope with red, blue and yellow triangular flags.

Now also our safety mattresses may be creative digital custom printed and integrated into the building of attractive ski area kids' playgrounds. These mattresses can be produced in a wide range of sizes. And can be either fully, or partial custom printed. Contact us for more information.

COMING SOON

machinery and will start up when we feel ready. We look forward to this new challenge!

Examples of past produced 3D turning aid figures.

Kids ski school bibs have become very popular. Digital sublimation printing technique has made it far easier to print almost anything, with no order minimums.

We offer several different vest models, in several sizes, to fit kids of all ages and needs.

#A310 Men's FIS stretch race bibs are very popular due to high stretch and easy to make fit on kids of many sizes. Available also in smaller ladies size #A311. And even smaller kids size #A312.

#SX412 Kids size Ski-cross vest. Also available in larger ladies size #SX411.

#SX423 Kids XS older version Ski-cross vest, exists also in the regular kids size #SX422. As well as the larger ladies size #SX421.

On Ski-cross bibs edge band color can be selected from black, red, blue, white or yellow.

As usual, we require no order minimums for own print designs.

See page 28-32 for more information.

Our Hockey offering is a tight uniform program including a few different Hockey shirt styles, and gaiters, available in different choices of fabrics.

Heavy duty match shirts in 240 g/m2 Polyester fabric. Replica shirts in 145 g/m2 Polyester fabric. And Gaiters in 240 g/m2 stretch Polyester fabric.

All shirts are fully digital printed, with digits and names incorporated in the print, with no required order minimums and a delivery time of 2-4 weeks.

The Motocross, Enduro and BMX offering builds on a similar basis. A few styles, all digitally printed. And prints include digits as well as names.

Owning our own sewing factory, that includes large digital printing capacity, and has long experience of producing alpine team uniforms, is it only a small step to offer similar services to other sports. Ice Hockey was first out. And has now been followed by BMX, Enduro and Motocross. Other sports will soon follow. Significant for our offering is high quality, no order minimums, indefinite re-order ability and great flexibility.

For more information or to order, contact your countries Beyond-X representative (page 83).
