

PRODUCT CATALOGUE 2025-26

• WWW.BEYONDX.COM •

B-stedt of Sweden AB, a Swedish family business, is the founder and owner of the Beyond-X brand.

Despite our relative small size, we run a Norwegian sister company Beyond-X Norway AS, and our own Polish production facility B-stedt Polska Sp. z o.o. And as this catalogue is evidence of, offer a massive product range.

tion facility B-stedt Polska Sp. z o.o. And as this catalogue is evidence of, offer a massive product range.

Family business.

We are deeply rooted in the sport of alpine skiing, with owner, CEO Gunnar Bergstedt being a former Swedish national team skier, that also competed many years on Pro Tours in primarily North America. After retiring from ski racing, he started importing Spyder skiwear to Sweden, and later became the distributor for Scandinavia and Greenland. His kids and son-in-law also all have ski racing background.

Own production facility.

In 1994 a joint-venture sewing factory was started in Poland, to produce the worlds very first alpine ski team uniform program "Spyder ProGear", that Gunnar developed, and produced. In 1999 the very own sewing factory B-stedt Polska was founded. Parallel with the start of the Beyond-X ski wear brand, that took the team uniform concept to a new level.

Digital printing technique.

At the same time, an investment in Europe's 5th sold large format digital sublimation printer was made, and opened up new printing possibilities, that fundamentally shaped the company's future and product range.

In those days, digital sublimation printing was used mainly to produce trade show samples. We were one of the first to use it for production, at that time, primarily for alpine racing suits.

This opened up new possibilities and greatly increased our printing flexibility, that today has led us to become possibly the world's leading race suit producer. Digital sublimation printing is today the predominant printing technique for competition race bibs, gate panels, speed suits and printed C-net.

Slalom poles.

In 2009 we started importing and selling American Break-A-Way slalom poles, their Featherbase brush base had started a revolution in slalom course setting. This was not the first ever slalom pole brush base. While others thought this was something only suited for recreational racing, we proved this would be the future for all

ski racing. How many still screw their slalom poles? Since 2018 we produce our own slalom poles under the Beyond-X label.

Ski area utility products.

Beginning with slalom poles, a bunch of accessories, such as B & C-net and drill bits were added to our offering. And in 2014 an investment was made, that eventually made the development of digital printed C-net possible. These have become immensely popular, and continuously find new areas of use.

They also offer functional and tasteful exposure for sponsors and/or partners, that can help finance investments.

Yet another investment in 2019 enabled production of safety mattresses, with the help of many ski patrollers opinions, have become state of the art mattresses. After another investment in 2021, these can now be digitally printed with UV-printing, even on the uneven anti-slip fabrics we produce our mattresses from.

During the past decade our FUNSKI kids ski playground product range has grown into a massive product range. We offer a vast number of products that can be digitally custom printed to generate unique and inviting surroundings.

In fact, we started out as a ski wear brand, but are more and more becoming a major producer of needed ski area utility products.

We have made it easier to generate attractive, good looking and very function-

al ski area environments, at reasonable prices. Not seldom, due to our printing flexibility, sponsor and/or partner exposure can help financing the investment. Our flexibility is the key. And it is made possible only by us owning our own production facility!

Plastic ski slopes.

Lately we have taken yet another step, with a non Beyond-X product. We have been selling Mr.Snow Textile Snow Carpets in Sweden and Norway, for the past decade. Mainly for lift tracks, lift entrances and exits. In 2025 this has taken on a new dimension in the building of a 5 000 m2 miniature ski area with 6 trails and 2 lifts, in Denmark. And here again Beyond-X ski area utility products have yet again become very useful, with C & B-net surrounding the area, and safety mattresses and with post-covers wherever needed. There surely will be plenty more, smaller or larger, similar projects onwards.

CONTENT

Beyond-X is the world's leading alpine race suit producer. In addition to our own race suits, we also produce for several competitors.

We also were the first to offer digital sublimation printed suits almost 25 years ago. That today is the standard process.

From us you can order padded GS (removable pads), or non padded DH suits, regular fit or slim fit suits, FIS or non-FIS suits.

We have no order minimums. So, you can order one single suit in your individual print design. And it can be ordered and produced year around.

For years we have been working hard to resolve the most common race suit complaint, fabric pilling. Since a few years, both our FIS and non-FIS fabrics are of Low-pilling kind, that offer far greater resistance to fabric pilling, yet retaining great elasticity, fit and comfort.

- We offer standard print designs, available in several standard colorways.
- A Colorlab, where 6 standard designs can be color blocked from a standard color pallet.
- All the above suits can have logos added, for a small extra fee, provided proper instructions and logos in vector format (like .ai or .crd files), not pixel (like .png or low resolution .jpg files) format, are supplied.

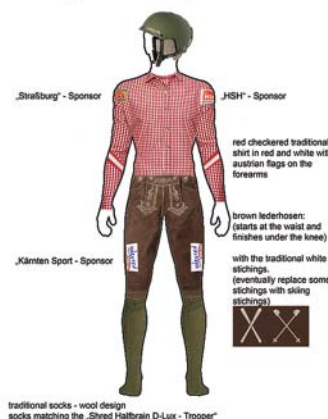

Readymade print design.

- The Colorlab designs can also be used as a base, from where alterations can be made, and logos be added. There will be a design fee for such work.

- And finally, completely own designs can be generated. Again, provided proper instructions and logos in vector format (like .ai or .cdr files), not pixel (like .png or low resolution .jpg files) format, are supplied. Work on such designs will be charged / hour.

Suit Design No. 1 / Richi Leitgeb

Drawings and written instructions.

Your own ready-made designs, made well enough to be used in production, will not be charged any development fees.

We can print essentially everything that our customers can print out on a regular computer printer. The difficulty lies in making placement fit on the 3D body of the athlete.

A clear idea and good instructions will be of great help. Color preferences in Pantone Solid Coated color # (PMS #) will also be useful. These pages show only a few examples of print designs we have produced. And if the process started with a phone call, a photo of something in the design direction, written instructions, provided illustrations, or ready-made artwork.

Readymade print design.

For FIS suits, FIS advertising rules must be considered. No single sponsor logo shall exceed 100 cm². The logo must fit inside a 100 cm² rectangle. Total surface of all sponsor markings shall not exceed 450 cm². Remains 370 cm² once the three mandatory Beyond-X logos on the suit, have been deducted. No sponsor marking in the bib area.

All FIS suits are available in sizes S-XXXL, and non-FIS suits in sizes XXS-XXXL (See race suit size table on page 9).

BR37 FIS GS suit (also available in SlimFit cut **BR237**).

BR39 FIS DH suit (also available in SlimFit cut **BR239**).

BR43 Non-FIS GS suit (also available in SlimFit cut **BR243**).

BR45 Non-FIS DH suit (also available in SlimFit cut **BR245**).

ColorLab

Our race suit ColorLab makes it easy for someone that lacks computer graphic program, or the skills to generate own print graphic designs. Choose among 6 different print designs, and color-block them by choosing any of the 25 available standard colors, for each area of the design. By coloring 2 or 3 color ranges with the same color, some design objects will disappear.

The ColorLab could also help customers to make some headway when generating own print design, by using the ColorLab as a base, and then make alterations, add logos and/or other design elements.

To the left a Speed print design with added gradient and stars in color range 3. To the right a Valhalla design with added logos, and different background pattern.

Caution! All highly elastic fabrics pill. To minimize fabric pilling avoid contact with abrasive surfaces, such as Velcro.

Knitted beanies in custom design for your ski club, company or event. Embroidery or patch can be added. Min. order quantity 50 pcs. For more information, contact your local Beyond-X distributor.

#GC100. Digital printed stretch "Goggle cover". Protects ski goggle lenses. Unlimited colors in print, no order minimum (start cost/design applied).

Size Guide

Please note that the guides below are merely size guides. Fit expectations are very individual. For team uniform orders we therefore recommend contacting your Beyond-X representative for a sample of garment size run.

Also note that different kind of garments has different size guides.

A: Jackets & Pants*

** Note that the above are aproximate body measurments.

RTG-garments are clothing to be worn over race suit. Made from elastic Soft-Shell fabric that offers some warmth, but mainly protects by blocking out wind. Makes training more like race-alike. With RTG you can train longer, before you need to go indoors for warmth.

CSFBF40 Snowboard Soft-Shell jacket

Fully printed long jacket with inside lift ticket and phone pockets. Bottom drawcord adjustment.

Sizes: S-XL

All SoftShell garments on this page uses SoftShell & Fleece size table on page 9.

Beyond-X jackets and pants are part of our team uniform program. Regardless if you are a private person, team or ski area, you can color your garment after your own mind, and order one single piece.

Reorders of exact same garments is possible for at least another three years, often up to five years.

Our uniforms are offered in kids and adult sizes, where some models are also available in ladies cut/sizes.

Uniforms can be ordered as shell or insulated, in 2- or 3-layer fabrics and some models can be partially custom printed.

Nowadays we also offer fully custom printed uniforms, see pages 4-9. Possibly, this is the most flexible ski uniform program in the world.

Individual coloration can be done in our online ColorLab at www.beyondx.com. For designs that includes own custom prints, contact your representative, for information and help.

Our light and flexible fabrics offer 20.000mm water resistance and 20.000g/m²/24h air permeability, in 2- or 3-layer fabrics.

Customizing Beyond-X clothing

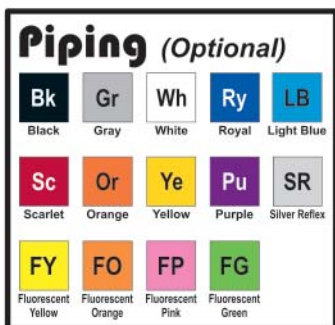

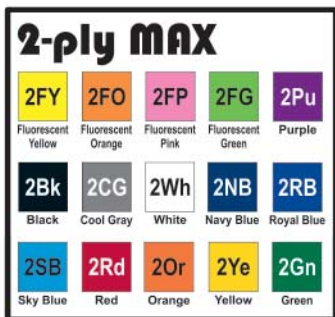

All Beyond-X clothing can, in one way or another, be customized. It can be by custom coloration, prints, embroideries, patches and so on. All jackets and pants can be custom colored your own way, according to a system where garments are divided into areas, where you select color of each area. That means thousands, sometimes millions, possible color ways of a garment.

Palette here shows available colors. In our web site www.beyondx.com you can select "ColorLab" and play with coloration online. Just click color and area, and you can see the result directly on screen.

In addition, many of our models can include prints. Coloration, pattern and logos, everything is printed in one operation.

We also have in-house embroidery and patch service department. Send embroidery programs and patches to us with instructions. We apply and tape backing for water resistance, before garment is assembled.

Contact us for more info.

Beyond-X collection jackets / pants

BX200 jackets

Jacket with integrated hood. As shell or insulated, in dyed or custom printed options. Appreciated by teams and ski areas. Regular fit. See page 23.

BX100 pants

Pants with thigh pockets. As shell or insulated, in dyed or custom printed options. With or without full side zippers. Regular fit. See page 23.

B600 jackets

Jacket with optional hood. More loose fit, for teams and ski areas. In standard dyed fabrics, or fully printed. See page 21.

B600 pants

Pants with full side zippers. As shell or insulated, in dyed or custom printed options. See page 21.

Jacket with optional hood. Custom colored with standard dyed fabrics. Can also be partially custom printed. See page 26-27.

B418 / B419 pants

Pants with full size zippers (B418) or ventilation zippers (B419). Custom colored with standard dyed fabrics. See page 25.

B226 jackets

Jacket with optional hood. Custom colored with standard dyed fabrics. Large areas (in red) can also be custom printed. Loose fit. See page 26-27.

B414 / B415 pants

Pants with full size zippers (B414) or ventilation zippers (B415). Custom colored with standard dyed fabrics. See page 25.

BA550 jackets

Work and Ski Patrol jacket. Lots of pockets and features, for working in the slopes. Also available in extra long model. See page 50.

BA518SP / BA519SP pants

Our famous coach and work pants. As waist (BA518) or high (BA519) model. See page 48-49.

**All models in unisex, ladies and kids styles, if no other written info.
All models are made after own coloeation or custom prints, without
order minimums.**

Q30/Q80 Quilted jacket

Hybride jacket with quilted body and softshell in sides and sleeves, that can also be custom printed. See page 14.

Q36/Q86 Quilted vest

Quilted vest with softshell sides, that can be custom printed. See page 15.

BF50/ BF52 / BF53

SoftShell jackets in different fits. In solid colors, or custom printed. See page 10 & 16.

BF47/BF48

Softshell vests in different fits. In solid colors, or custom printed. See page 11-12.

R21 Rain coat

Simple over-sized rain coat with hood. Available in red and blue. Can be shortened into a regular lenght rain jacket. See page 48.

R21b Rain coat

Fully printed option of R21 Rain coat. In 2-layer polyestred fabric and liner. See page 48.

R37 Storm coat

Shell coat with integrated hood. Over-sized, to be worn over regular jacket. See page 49.

R38 coat

A more simpler long coat for both racers and parents. See page 49.

R36 Coat

Coaches coat #1! Lots of useful pockets and functions. With removeable insulation. See page 49.

R46b Coat

Fully printed option of R36 coaches coat. See page 48.

Individually fully printed ski jackets and pants. A development sprung from years of experience in digitally printing race bibs, gate panels and race suits.

Virtually everything printable on your home computer printer, can be printed onto our garments. The only limitation is your imagination!

It is however, no easy task to develop such own fully printed garment print design. The garments consist of many parts. If it would have been easy, this would have been done long time ago! Contact your local representative for more information and help.

The garments can be ordered, without minimums:

A*: With insulation.

C*: 3-layer shell garments, without lining or insulation.

In woman, unisex and kids sizes. Several order dealines per year, and reorder ability for at least 3 years. Most likely, this is the only offering of its kind, worldwide!

C*. **B628b-**, Shell jacket in 3-layer fabric with water resistant zippers, chest pockets, side pockets, inside pocket and key card pocket. Snap attachment for optional B691b-/B692b hood.

Sizes: Unisex XS-XXL.

Obviously, the result of our flexibility is that same jacket appears in many variations. Producing this in a regular sewing factory, with 600 pieces/style minimum, would be impos-

Important note! Digital printed garments are not as fading resistant as those made of dyed fabric. Since ink is only applied to fabric surface a denim like look can soon appear, resulting from below white fibers being pulled up to the fabric surface, especially on dark prints.

sible. We can offer this, because we own our own factory, where no one else sets limitations. This is something very unique!

Our extreme flexibility has triggered a demand to generate a group identity, by using race bibs. No order minimums, re-order ability, and the possibility to add individuals names, have made many teams order our bibs. An added benefit is that coaches more easily can identify their skiers from a distance.

Our all digital printed stretch race bibs, have grown very popular.

We have no order minimums. The prints can include millions of colors, unlimited number of logos, without any price increase. And additional or lost bibs can be re-ordered.

Our stretch bibs are produced of a high quality 4-way highly stretchable fabric that with ease fits a large size range, and will keep on looking great for many years.

We offer a large variety of stretch bibs, in many sizes. Since they are durable and also work well in water, an ever growing range of other sports understand their advantages. We have been responsive and have developed a number of specialized stretch bibs for other sports.

A330 (T-type) & A331 (Raglan-type)
Snowboard stretch T-shirt.
Sizes: L-XL

SBZ631D SkiX panel

SkiX and snowboard SL panel 105x800x10cm. In 1-layer mesh fabric printed from both sides. Where back side appear mirrored.

SB730 FIS SkiX panel

FIS approved snowboard and SkiX SL panel 100x80x20cm, with 40cm high stubbie tunnel. In 1-layer mesh fabric in standard colors. Can be screen printed from one side.

SBZ731D FIS SkiX panel

Like SB730, but printed from both sides. Where back side appear mirrored.

SB530 FIS SkiX SL panel

Like SB531DD, but 1-layer mesh fabric in standard colors. Can be screen printed from one side.

Snowboard panels are preferably mounted on a PC160W pole and a ST40.XB stubbie.

SB631DD SkiX panel

Like SBZ631D, but in 2-layer mesh fabric and double side print (correctly turned).

SB531DD FIS SkiX SL panel

FIS approved SkiX and snowboard panel 105x80x40cm. 2-layer mesh fabric and double side print (correctly turned).

SB831DD FIS Snowboard GS panel

FIS approved snowboard panel 130x100x20cm, with 40cm high stubbie tunnel. 2-layer mesh fabric and double side print (correctly turned).

SB830 FIS Snowboard GS panel

Like SB831DD, but 1-layer mesh fabric in standard colors. Can be screen printed from one side.

SBZ831D FIS Snowboard GS panel

Like SB830, but printed from both sides. Where back side appear mirrored.

**ST450 Stewards Bib**

Sizes: M-XXL

**M430 Mogul Race Bib**

Sizes: M-XXL

ST461 Motorsport Stewards Bib, with rear pocket. Also available as ST460 without rear pocket.

AB500 Stretch Arm band, 8 cm wide, one-way printed 2-way stretch arm band.

SX410b Stewards Bib, a 5cm longer version of SX410 Men's SkiX Bib.

SX420 SkiX Bib, men's size race bib, also available as SX421 Women's size and SX422 Kids size.

SX450 Work Bib, with sewn reflex and front zipper. In men and ladies size.

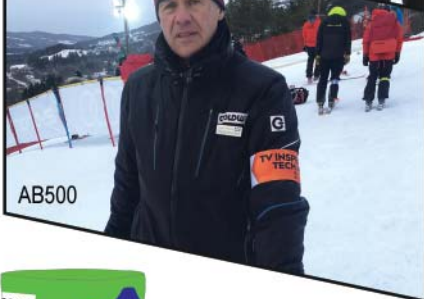

AB510 Stretch Arm band, same as AB500 but with adjustable Velcro closure.

AB485 Arm Band, adult size 4-way stretch arm band 21cm high. All sublimation printed. Also available as AB484 Kids size, 17cm high, that also could be used as a leg band.

AB480 Arm Band, 4-way stretch adult arm band. 12cm wide. Also available as AB48 Kids size arm band.

**SX410b****SX410b****ST450****AB500**

Backdrop #BD360x190.

A relatively inexpensive 3.6m wide and 1.9m high award ceremony backdrop. One side digital print. With upper sewn in reinforcement, to keep nicely stretched. Sewn mounting pole tunnels, with elastic Bungee-cords at each end. Mounted on 4, 250cm long B-net poles.

Custom printed info-panels

Digitally printed, no order minimum. Fibre-glass rod at upper edge prevent panel from hanging.

SP580D Big Information Panel

150x145cm panel in one layer thin mesh fabric with digital print on one side. Print bleeds through to back side with about 70% intensity and will appear mirrored. Preferable mounted on two PC215/31 poles.

C551D Information Panel

95x115cm panel in one layer mesh fabric with digital print on one side. Print bleeds through to back side with about 70% intensity and will appear mirrored.

Start/Finish panels. Fully digitally printed 70x170cm, mounted on 2 pc. 31mm 215cm poles (not included).

SFZ561D Start/Finish Info Panel

One layer heavy mesh fabric, back side is printed mirrored but as clear as the front print.

SF561DD Start/Finish Info Panel

Two layers heavy mesh fabric, both sides appearing correct.

Alpine gate panels

We offer a wide selection of gate panels.

FIS-homologated gate panels 75x50cm, for GS, SG and DH.

Training panels (non FIS-homologated) 75x50cm for GS, SG and DH.

Kids size panels 55x40cm.

All panels available in any of our three print methods.

Panels are made from heavy duty mesh fabric that lets wind through. Attaches to poles with elastic Bungee cords.

No order minimums.

Standard gate panel colors

Edge band colors

P80/31W - 80cm long stiff 31mm Ø pole with 15cm ribbed hose.

KFHP 50 - 50cm long 31mm Ø pole with hinge and 30cm PVC pole base.

ST40FW - 40cm long 31mm Ø pole with hinge and 30cm ribbed hose base.

ST40FXBL - 40cm long 31mm Ø pole with hinge and XBase Lite base.

SKA510WHF - Welded red or blue PVC fabric kick-flag L28xH17cm on 30cm long 31mm Ø pole, with hinge and 30cm ribbed hose base.

KA500 - Welded red or blue PVC-fabric kick-flag L28xH17cm on 50cm long 31mm Ø pole.

PA512 GS Training Gate Panel
75x50cm gate panel in standard panel fabric color that can be screen printed on one side. The print is visible only on one side. The panel is sewn with reinforced edge bands.

PA513D GS Training Gate Panel
75x50cm gate panel in one layer heavy mesh fabric with digital print on both sides. Back side is printed mirrored but as clear as the front print. The panel is sewn with reinforced edge bands.

PA513DD GS Training Gate Panel
75x50cm gate panel in two layers heavy mesh fabric with digital print on both sides and both appearing correct. The panel is sewn with reinforced edge bands.

Print methods

1. One-color screen print on one side. Panels made in one of the nine standard colors (see #PA512).

2. One-layer panels made from extra heavy duty mesh fabric. These panels are digitally printed from both sides, back side appearing mirrored. Can contain any graphics and unlimited colors (see #PAZ513D).

3. Two-layer panels made from mesh fabric. Both sides digitally printed and appear correct. Can contain any graphics and unlimited colors (see #PA513DD).

All panels with reinforcement edge band at upper and lower edge, in any of the standard colors.

Gate panels in standard fabric colors with 1-color screen print from one side:

#BXR97, FIS GS, SG & DH 75x50cm.

#PA512, Non-FIS 75x50cm gate panel.

#PA510, Non FIS 55x40cm kids gate panel.

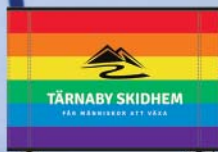

1-layer digitally printed panels, back side mirrored:

#BXRZ297D, FIS GS, SG & DH 75x50cm gate panel.

#PAZ513D, Non-FIS 75x50cm gate panel.

#PAZ511D, Non FIS 55x40 cm kids gate panel.

News! 1-layer digitally printed panels, back side mirrored, made from net fabric.

#GXRZ297D, FIS GS, SG & DH 75x50cm gate panel.

#GAZ513D, Non-FIS 75x50cm gate panel.

#GAZ511D, Non FIS 55x40 cm kids gate panel.

2-layer digitally printed panels, back side correct:

#BXR297DD, FIS GS, SG & DH gate panel 75x50cm.

#PA513DD, Non-FIS 75x50cm gate panel.

#PA511DD, Non FIS 55x40 cm kids gate panel.

MOS31F.XB - 31 mm metal hinge FIS slalom pole (A-pole) with 175cm reinforced shafts and XBase. Available in red, blue and orange.

PO31F.XB - 31 mm plastic hinge FIS slalom pole (A-pole) with 175cm reinforced shafts and XBase. Available in red, blue and orange.

RRS31 - 31mm, 175cm reinforced replacement shaft.

RC007REIN - 30cm reinforcement tube for 31mm poles.

TCHR31 - Top cap for 31mm reinforced poles.

EP31 - 31mm edge protector.

Beyond-X offers a wide range of quality slalom poles. All 27 and 31mm poles are reinforced with a 30cm shaft insert at the top, the most sensitive part of the pole.

Our XBase Lite and heavy duty XBase brush bases are massive time savers in course setting and pulling, as well as limit course maintenance. They function in almost all snow conditions and require no other tool than a power drill machine and a drill bit. The Bases are only 28cm long and can be used in indoor ski halls and in thinner snow covers. They work so well, that our competitors have unsuccessfully attempted to prevent us from selling them!

The hinges have been upgraded to a new XM-FLEX metal hinge and the XP-FLEX plastic hinge. And the softer SP-FLEX plastic hinge for 25mm poles.

XB - XBase Heavy Duty brush base. For 40-41mm holes. Only 28cm long.

The mission to improve our products is a never-ending task, as the sport increasingly challenges the limit of plastic durability.

All parts and components in our poles are also sold separately, which saves money in maintenance and reparations.

EP27 - 27mm
edge protector/
adapter.

MOS27FXB - 27 mm metal hinge FIS slalom pole (B-pole) with 167cm reinforced shafts and XBase. Available in red, blue and orange.

TCHR27 - Top cap for
27mm reinforced poles.

POS27FXB - 27 mm plastic hinge FIS slalom pole (B-pole) with 167cm reinforced shafts and XBase. Available in red, blue and orange.

RC006REIN - 30cm
reinforcement tube for
27mm poles.

RRS27 - 27mm, 167cm reinforced replacement shaft.

XP-FLEX - Plastic hinge
with TPU core and
PC knuckles.

Our non-turning poles is an affordable and light weight alternative to using two flex poles for a giant slalom gate. It also prevents the gate from blowing into the track, in windy conditions. The ribbed hose at bottom gives it a 40mm diameter, same as our brush bases.

However, not approved for FIS races.

XM-FLEX - Metal hinge with
embedded stainless steel wire and
heavy duty machine springs.

PC215/31W - Stiff Non-FIS 31mm pole, 215cm long. Non-turning pole with ribbed 40mm hose base, for GS, SG and DH. Light weight and wind resistant. Available in red, blue and orange.

Cut30 - 30cm
ribbed hose,
fits 30-31mm
poles.

PC215/31 - 31mm, 215cm long PC Replacement shaft.

BX SLALOM POLES

S25F.XBL - 25 mm plastic hinge slalom pole (C-pole) with 150cm shafts and XBase Lite. Available in red and blue.

EP25 - 25mm edge protector.

SP-FLEX - Softer plastic hinge for 25mm poles.

RS25 - 25mm, 150cm replacement shaft.

BG25W - 25cm long brush gate in red, blue, green or pink. With 40mm ϕ ribbed hose, giving the same base ϕ as XBase, helps the brush gate to stay put. Versatile turning aid for racers as well as ski school use.

BG25 - 25cm long turning aid in red, blue, green and pink. 30mm ϕ base.

LU50, Brush gate turning aid practical storage and carrying bag that can be hung from the belt. Holds 15-20 brush gates.

QClip80, 8mm 80cm long red elastic slalom pole bundle strap. Quick, easy and flexible bundling aid.

LU40, slalom pole carrying bag with heavy shoulder strap. Holds 25 poles.

BM17 - 17cm long marking brush, available in red, blue and green. With a 17mm ϕ base. Ideal for marking of chair lift loading area, or the cross-country start & finish stadium area.

STUMPIE - 85cm long perforated plastic tube with a brush insert at bottom. Work the same way as our XBase's. Available in red, blue and green. An affordable light weight turning aid, perfect for ski schools. Also used by national teams.

Use with 35-41mm drill bits.

LU61, Stubbie carrying bag that can be carried like a backpack. Holds 30 Stubbies.

XBL - XBase Lite Brush base.

ST-CT - Stubbie connector.

ST-CM - Stubbie connector rubber hose.

ST60-SSHB - 60cm (above snow) soft SL Stubbie with 15cm ribbed hose base. Available in red or blue.

RS85 - 85cm replacement shaft for ST60-SSHB.

ST60.XBL - 60cm soft SL Stubbie with XBase Lite brush base. Available in red or blue.

RS60 - 60cm replacement shaft for ST60.XBL.

ST40-SSHB - 40cm (above snow) Soft SL Stubbie with 15cm ribbed hose. Available in red or blue.

RS65 - 65cm replacement shaft for ST40-SSHB.

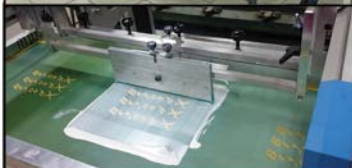

ST40.XBL - 40cm soft SL stubbie with XBase Lite brush base. Available in red or blue.

RS40 - 40cm replacement shaft for ST40.

Slalom pole custom prints

Since we sell a few poles, at times it can get hard to keep track of ones poles.

To solve this, we offer custom one-color logo prints, at reasonable cost, on our poles. These are available only on orders being shipped out of our Polish factory.

The prints are available in six different colors and require a 60 shaft minimum order.

Prints can be up to 50cm long, and consist of 1, 2 or even three prints around the shaft.

Print option is available on slalom poles, delimiting poles, B-net poles, and on C-net and sign poles.

Milwaukee Switch tank 18V

A powerful easy to use sprayer that is powered by the same 18V batteries used with Milwaukee power drill machines.

With removable/exchangeable tank, and heavy-duty harness and hip strap. Includes tank, harness, battery and charger.

PB1000

Blue, red or green color pigment powder. 1 kg pigment powder mixed with water and anti-freeze will be enough for 1000L. This pigment is harmless and used in the food industry.

#JON, heavy duty Aluminum snow shaper/shovel.

#TM15, 15m measure tape.

#TM30, 30m measure tape.

#50040078

10mm x 200m long UV-resistant Polyethylene rope. Available in red, blue or yellow/black.

#41695
Launch pads

#41695, Heavy rubber 33x33cm launch pads. Easy to install, without need to water down. Eliminate developing of holes, where ski poles can get stuck.

#AB500, 2-way stretch heavy duty 8cm wide, digital printed FIS-standard arm/leg-band. Will not fold or wrinkle.

#BA510, same as above, but with added adjustable Velcro closure.

Blue Devil
Spray Yet

#Blue Devil Spray Yet. Heavy duty fire fighter Nozzle with Pistol grip and 2" Cam lock connection.

#WIB 140. AL31 valve, weight 7kg. CamLock 2" connection.

#Cam90. CamLock 2" 90° bend

#CamEnd. CamLock 2" end plug.

#WIB 150. Formtex CamLock 2" 1,2m hose with protective metal spiral. Incl. 90° bend in one end.

Nozzles

#WIB100. Only 20kg aluminium balk, with 44st permanent nozzles, 4.4m longd. Can be taken apart in two pieces, for easy transport. Cam lock 2" connections in both ends.

#WIB110. 2.1m long beam extension. Increases total length to 6.5m.

#Milwaukee M18 FDD3-502x

5A, 18V heavy duty brushless power drill machine with 13mm metal chuck. 2 gears, 0-2000 rpm – incredible 135Nm (please note that other very similar Milwaukee models offer less than half of this), electronic clutch with 13 torque settings. 2,5 Kg, 2 batteries and charger.

Connect via Bluetooth with Milwaukee ONE-KEY app. Complete tool customization via ONE-KEY, control speed, torque, start & end speed, anti-kickback functions and LED.

Metal drill bits with 2 hard metal points and triangular shank.

50cm length, 12mm shank.

#41265, 19mm drill bit (for fence fiberglass poles).

#SLO32, 32mm drill bit (for 31mm fence poles).

#SLO35, 35mm drill bit (for B-net poles).

#SLO38, 38mm drill bit.

#SLO41, 41mm drill bit (for XBase).

#SLO41/24, 41mm drill bit with high blockage (for indoor ski hall use).

#SLO45, 45mm drill bit.

Milwaukee M18
FDD3-502X

Aluminum drill bits

The future has arrived! Constructed of a special airplane Aluminum/Cooper alloy this drill bit weighs in at half the weight of a traditional steel drill bit, yet is as strong!

It comes with a 12mm triangular shank, and 50cm length. With two exchangeable hard metal points, that is slightly angled for maximum bite also on the hardest of ice. The used "Helix angle" ensures optimal transportation efficiency of snow and ice up and out of the hole. And it comes in really cool colors!

#ALU32, 32mm Yellow drill bit for 31mm fence poles.

#ALU35, 35mm Red drill bit for B-net poles.

#ALU38, 38mm Blue drill bit.

#ALU40, 40mm Purple drill bit for XBase.

#ALU32-35R, replacement hard metal points for 32 & 35mm drill bits.

#ALU38-40R, replacement hard metal points for 38 & 40mm drill bits.

Milwaukee warranty

2 year warranty on all Milwaukee machines and batteries, extended to 3 years if machine is registered on to Milwaukee's Internet site.

OrangeFox

The plastic drill bit that revolutionized course setting. Extremely light weight with exchangeable and rotating hard metal points.

#RCP13b

#RCP13

#RCP13 Radio Chest Pack.

With one angled, adjustable radio bay that fit most Com-radio sizes. Equipped with two pockets and a pen loop. Adjustable shoulder and chest straps.

#RCP13b Radio Chest Pack.

Same as RCP13 but with custom print on main pocket lid.

#RCP11 Radio Chest Pack. With two adjustable, angled radio bays that fit most Com-radio sizes. Equipped with one large pocket and a pen loop. Adjustable shoulder and chest straps.

#RCP11

#RCP12

#RCP12 Radio Shoulder Sling. With one adjustable radio bay that fits most Com-radio sizes. Adjustable straps.

Functional and heavy duty radio packs reasonable priced. Custom prints also possible.

We grew tired of selling coaches backpacks where seams started to tear after only a few months of use. So we decided to use some capacity of our factory, to take care of this matter.

We have developed a small collection of four backpacks for various purposes. They are all very Heavy Duty, made to last. Made from PU-coated polyester weave with bottom water-proof reinforcement fabric (not LU75). Heavy duty carrying straps, and zippers. Padded back and bottom with hard plastic back inlay (not LU75).

Coaches backpacks equipped with lots of functional pockets for equipment like drill bits and drill machines. The many pockets make it easy to separate necessities and keep them organized.

Our boot bag and the smaller all-round backpack made from same heavy duty materials.

#LU71

#LU71 Large Coaches Backpack

80 liter backpack with main compartment and another 11 compartments, for various purposes.

#LU-pall

LU-Stool

Accessory, fits in our backpacks LU71, LU74 and LU80.

#LU74 Coaches Backpack

57 liter backpack with main compartment and another 11 compartments, for various purposes.

#LU74b

Same as LU74, but with lower panel custom printed.

#LU74b

#LU75 Universal Backpack

29 liter backpack with main compartment and another 3 compartments, plus 2 outside elastic mesh pockets.

#LU75

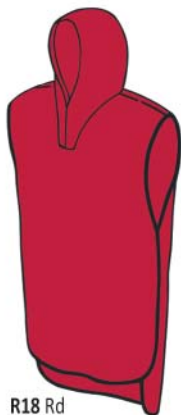

#LU80 Boot bag

50 liter boot bag with large main compartment and another 9 compartments.

#LU80

**R18 Rd**

R18 Oversize Poncho with hood. Sides are joined via push buttons. Non breathable fully waterproof fabric. Available in red and royal blue. Sizes: XXS-XXL.

**R21 Ry**

R21 Oversize rain coat with hood and two side pockets. Non breathable fully waterproof fabric. Available in red and royal blue. Sizes: XXS-XXL.

**R21b Print**

R21b. This is a fully printed version of our R21 oversize rain coat made out of 2-ply woven fabric and lined. 2 side pockets and permanent hood. The bottom can be shortened by turning fabric inwards and securing with snap buttons. Sizes XXS-XXL.

**R46b Print**

R46b. Fully loaded coached coat. Same functions as R36, but fully custom printed. Sizes XXS-XXL.

BA518SP Coaches Waist Pant. Our popular Coaches waist pant is as good as they come, with re-enforced knee and seat areas, cargo pockets and SoftShell waist area. This same pant is also used in the official Swedish and Norwegian Ski Patrol uniforms. Available in sizes XS-XXL, where S-XL also can be ordered with 5cm longer or shorter leg-length.

COACHES CLOTHING

BA586

Garments can be re-ordered, without minimum order quantities, several times / year, and a minimum of 3 years. Often over 5 years. This enables keeping uniforms complete and increasing uniform life-span an additional 1-2 seasons.

Heavy duty work jacket for ski areas (same model as ski patrol). Equipped with lots of useful pockets and functions. Also in ladies cut (BA550WSP) Sizes XS-XXXL.

BA586 Heavy-duty tool-vest, to be worn over regular jacket. Lots of useful pockets and radio holder. Sizes S-XXL.

We were primarily a ski wear manufacturer. Over the years though our customers, knowing that we own and run our own factory, with a wide range of machinery, have been looking at us for possible solutions to problems they faced.

Over time, we have evolved in to a ski area utility product manufacturer. And thanks to our printing capability, we have become a sort of advertising agency, with the difference that we print on utility products.

Our extremely functional and good looking info and advertising gate panels, with a sewn in upper fiberglass rod that prevents them from hanging, are mounted with elastic Bungee cord on to 215cm long PC-poles, and available in different shapes and sizes, printed from one side, or both sides, single fabric layer version showing back side mirrored, while both sides correctly turned on the two fabric layer version.

These are offered with no minimum order requirements, and short lead times.

During the pandemic, that created a sudden need and requirements, resulted in massive orders. What is displayed on this page, are only a few examples of prints we have produced.

CZ551D, One fabric layer caution panel 95x115cm, printed from both sides, back side mirrored. Preferably mounted on two PC215/31 poles.

C551DD, Two fabric layer caution panel 95x115cm, printed correctly from both sides. Preferably mounted on two PC215/31 poles.

SFZ561D, One fabric layer Start/Finish panel 70x170cm, printed from both sides, with back side mirrored. Preferably mounted on two PC215/31 poles.

SF561DD, Two fabric layer Start/Finish panel 70x170cm, printed correctly from both sides. Preferably mounted on two PC215/31 poles.

SP580D, One fabric layer Sign panel 150x145cm. Printed on front side. Preferably mounted on two PC215/31 poles.

SFZ561D & SF561DD

Name tags

Digital custom printed name tags with sewn border and Velcro hook backing. In different sizes and no order minimums.

Mattresses are one of our product segments that is growing fastest.

Our standard flat mattresses are light weight, easy to shape around poles, using close-cell tube foam with great shock absorption that don't absorb water.

8cm is standard mattress thickness. But nowadays also 12cm mattresses are being requested, for race areas. We can also produce 16cm mattresses.

Our flat mattresses are usually made from red, blue or black anti-slip PVC-fabric, treated for extra UV-resistance. We also offer other colors, in regular (not anti-slip) fabric.

A damaged mattress cover can easily be replaced, and the filling re-used.

Mattresses are normally delivered with three heavy duty woven bands with Acetal plastic buckles. But we also offer traditional grommets with elastic cord and metal hooks.

Standard 8cm thick mattresses:

- #SM1x2-08, 1x2m.
- #SM1.5x2-08, 1.5x2m.
- #SM2x2-08, 2x2m.
- #SM2.5x2-08, 2.5x2m.
- #SM3x2-08, 3x2m.
- #SM3.5x2-08, 3.5x2m.
- #SM4x2-08, 4x2m.

Standard 12cm thick mattresses:

- #SM1x2-12, 1x2m.
- #SM1.5x2-12, 1.5x2m.
- #SM2x2-12, 2x2m.
- #SM2.5x2-12, 2.5x2m.
- #SM3x2-12, 3x2m.
- #SM3.5x2-12, 3.5x2m.
- #SM4x2-12, 4x2m.

SAFETY MATTRESSES

#SM1.5x2-08
Custom printed

#SM1,5x2-08
Custom printed

With digital UV-printing, we are able to offer partial, or fully custom printed safety mattresses. This type of printing can also be applied to uneven surfaces as our anti-slip safety mattress surface.

This opens for integrating safety mattresses into a specific arena look.

For instance, in a Kids ski area playground, or a mountain bike track, where one doesn't like to place red or blue mattresses in the forest.

Perhaps printing sponsor logos on to mattresses, can turn the cost of buying mattresses, instead into a source of income!

#RME28x52x300

We produce custom pre-shaped post or tower safety mattresses, in regular (non anti-slip) PVC-fabric, with our tubular close-cell mattress foam, to fit the size of the object needing protection applied in 4, 8 or 12cm thickness. We offer choice of closure by Velcro, or elastic cord with hooks and grommets. Can be produced in different colors.

Some examples:

#CMV6x22x200, Ø6/22cm, 2m long and 8cm thick, with velcro.

#CMV15x31x200.

#CMV20x26x200.

#CMV30x46x200.

#CMV40x56x200.

#CME40x56x200, Ø40/56cm, 2m long and 8cm thick with cord and grommets.

#CME10x26x150, Ø10x26x1.5m. 8cm thick, with cord and grommets.

#RME28x52x300, Square mattress with 28x28 inner size, 12cm thick and 3m high with cord and grommets.

#CMV6x22x200

#RMV15x31x140

We also have produced custom shaped safety mattresses, where regular mattresses, for some reason, will not fit properly.

Contact your Beyond-X reps. for a price offer.

#HC W115xH105-04

#HC W115xH120-04

#SM2x2-08

#SM1.5x2-08

Hydrant covers are being made in several standard sizes, but can also be produced after customers' special requests. Hydrant covers are made with 4cm thick closed-cell foam. We also have a special model with a hatch that can be opened. This enables connection without removing the cover.

Standard Hydrant cover sizes:

#HC W80xH105-4cm

#HC W80xH200-4cm

#HC W100xH120-4cm

#HC W115xH105-4cm

#HCO W130xH105-04cm

HYDRANT COVERS

PC215/31 - 215cm long Ø31mm blue, red, or orange PC-pole.

215/31OR80 - 215cm long Ø31mm blue, red, green or black delimiting pole, with 80cm bright orange top and reflex stripe.

215/31OR30 - 215cm long Ø31mm blue, red, green or black delimiting pole, with 30cm bright orange top and reflex stripe.

PC215/31FY - 215cm long Ø31mm fluorescent yellow & black warning pole.

PC215/31FYOR - 215cm long Ø31mm fluorescent yellow & black warning pole with 30cm bright orange top.

PC200/25FY - 200cm long Ø25mm fluorescent yellow & black warning pole.

We produce delimiting poles out of very durable Polycarbonate (PC), with bottom cut at an angle. Available in blue, red, black, green and fluorescent yellow, with 5cm wide reflex stripe.

Ø31mm, 215cm long.
Ø35mm, 230cm long.

Fluorescent yellow
Ø25mm 200cm long.
Ø31mm 230cm long.
Ø35mm 230cm long.

PC230/35OR30 - 230cm long Ø35mm blue, redd, green or black delimiting pole, with 30cm bright orange top and reflex stripe.

PC230/35FY - 230cm long Ø35mm fluorescent yellow & black warning pole.

Some poles have 30cm or 80cm bright orange top.

News!

A low-price alternative made from high quality road marking poles. Not same durability as PC poles, but lower priced. Made from PP.

220cm long, 26mm diameter, with 20cm reflex.

Available in red, blue or green.

Only sold in 25-pack.

A Norwegian producer of a special, extremely durable T-bar catching pole, many years ago ended production of these. And now that old stock is worn out, ski areas are seeking a substitute. These are poles that prevent the T-bar to land in, and pick up snow, that will stick and melt against next users rear.

Not even our PC slalom pole shafts have proven worthy this task. So, we are developing a copy of

the original pole, in a special, extremely impact resistant plastic, with internal cross-section, 215cm long and 28mm Ø.

Article number :
#215-29 T-bar Rd

We are also developing a new triangular delimiting pole.

After discussing delimiting poles durability, it was thought a triangular shape could outdo the traditional round shape.

Continued discussions landed in a combined, or completely different possible use.

Due to its relatively large flat surface, smaller signs could be installed by simply screwing them on to such a pole, without use of mounting brackets, resulting in substantial cost saving.

In addition, the triangular shape, using proper size drill bit, will not rotate. Keeping the sign pointed in the right direction. These triangular PC-poles will be available in 35mm width and 180 or 215cm lengths. And available in black, red, blue and green.

Article number:
#180/35T
#215/35T

Plastic Signs

Metal signs can be dangerous to collide with.

Seeking a safer option, we landed in durable and flexible CP-plastic signs, that withstand cold temperatures without becoming fragile. These are digitally UV-printed and laminated with a scratch & UV-ray protection film, and thereafter laser cut to desirable shape. Usually with rounded corners, for increased safety. The signs can be mounted on 35mm Ø PC-poles, by means of our special developed sign mounting brackets. And by adding a B-net hook further down on the mounting pole, this will prevent the pole from rotating.

All produced from elastic, shock absorbent, durable materials.

As always, without order minimums.

We keep building a library with the most common print designs. However, anything that can be printed on a common computer printer, can we also print onto these signs.

We can produce signs up to size 150x120cm. Larger signs may require up to 2 mounting poles and 4 mounting brackets.

For wall mounting no mounting brackets will be required.

Different length sign poles are available.

UV-printer

Laser-cut machine

Below find some examples of signs we have produced in different shapes, sizes and colors, with different print designs.

Our investment in a large UV-printer, to print on mattresses, also made this production of printed PC plastic signs possible. A natural development, considering that we already produce printed panels and nets, also used for displaying messages.

Metal signs may be durable, but they are heavy, and dangerous to collide into. And the mounting parts cost almost as much as the sign itself.

Using our B-net hook, we developed a simple and great cost sign mounting bracket that fits on 35mm poles. These poles are shock absorbing if colliding into them. No tools is needed for mounting.

#SIGNHC

Sign mounting bracket, fits Ø35mm poles. Incl. 2st blind-rivets and washer.

Example:

#S20x20 PC, 20x20cm sign.

#S20x20 PC WBA, 20x20cm sign with one bracket.

#S25Ø PC, Ø25cm sign.

#S25Ø PC WBA, Ø25cm sign with one bracket.

#S44x60 PC, 44x60cm sign.

#S44x60 PC WBA, 44x60cm sign with two brackets.

#S30Ø PC WBA, Ø30cm sign with one bracket.

#100x100 PC, 100x100cm sign.

#100x100 PC WBA, 100x100cm sign with four brackets.

#FUN70, fabric/foam custom printable, 1m long, pole fits on to 35mm Ø PC-poles.

#B-net hook, to prevent rotation.

#PC160/35, 160cm long PC-pole, available in red, blue or green.

#PC180/355, 180cm long PC-pole, available in red, blue, green or black.

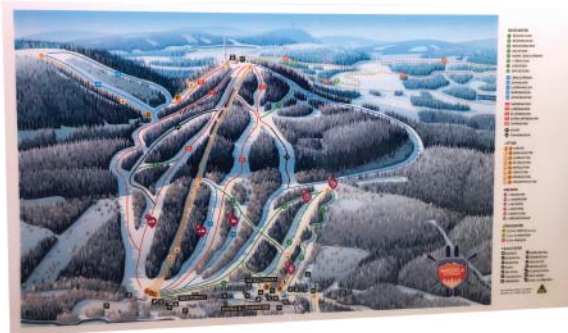

#PC230/355, 230cm long PC-B-net pole, available in red, blue, green or black.

We offer 35mm Ø sign mounting PC-poles in a range of colors and lengths.

In order to prevent the signs from rotating, we suggest adding a B-net hook on to pole, at snow level. This one will dig in to the snow, and prevent rotation.

1x1m signs are the largest we recommend for pole mounting.

Ski area trail map sign we can produce in up to maximum 200x120cm size. And then only suitable for wall mounting.

SIGNS

B-net clamp

B-net hook

#PC250/35, 250cm long 35mm \varnothing red or blue PC B-net pole to be used with 2m high B-net.

#PC180/35, 180cm long 35mm \varnothing red or blue PC B-net pole to be used with 1.3m high B-net.

#PC160/35, 160cm long 35mm \varnothing red or blue PC B-net pole to be used with 0.4m high B-net.

Security surrounding competition events, or ski areas in general, are becoming increasingly important. B-net is the most common and flexible safety netting solution. Only in extreme cases will the heavier so called A-net be required to achieve proper safety standard.

Beyond-X offers a wide range of Polyethylene high tenacity, highly UV-resistant red or blue B-net to fill different needs. All assembled, or sold as separate parts to assemble yourself, or to re-supply on components.

#B-net2x20

2m high and 20m long, with 3.5mm cord and 5x5cm mesh.

#B-net2x20.P11

Same as above, but fully assembled with 11 pieces of 2.5m long B-net poles, containing 2 B-net hooks each.

#NRW01

Manual B & C-net roll-up device. Saves lots of time and results in tight rolled up net. Can be lifted by means of fork lift.

>2.1 m

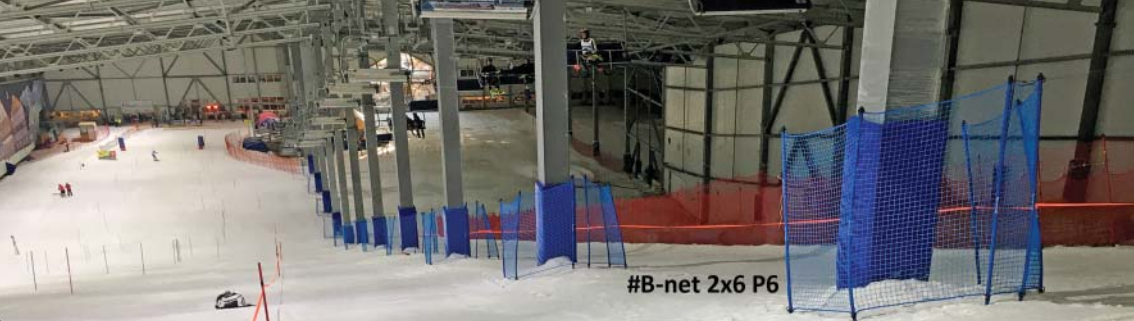

<0,5 m

Correct mounting of parallel mounted B-net, according to FIS-recommendations. Depending on conditions, sometimes 2 or even 3 parallel mounted B-net may be required.

#NRW01
Manual net-
roll-up device.

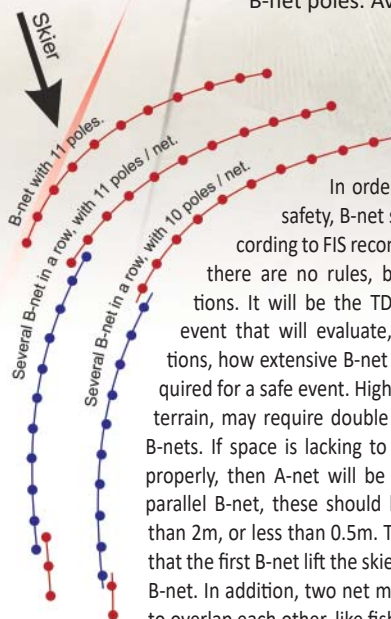

#B-net 2x6 P6

#B-net 2x6.P6

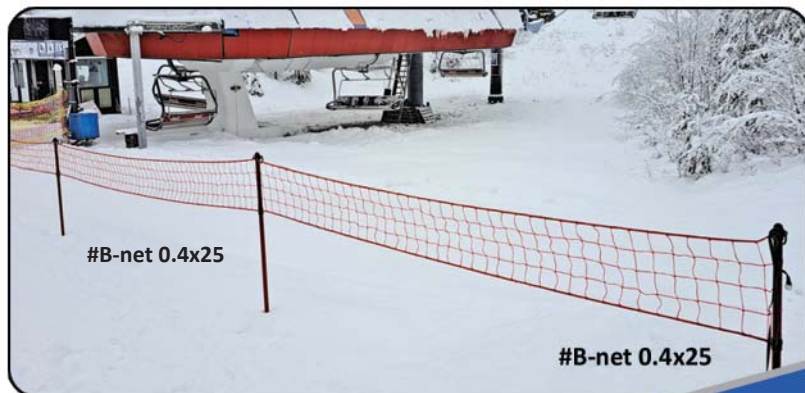

Lift tower safety B-net, 2m high, 6m long, with 3.5mm cord and 5x5cm mesh. Complete assembled with 6 B-net poles. Available in red or blue.

#B-net 2x6 P6

In order to achieve maximum safety, B-net should be mounted according to FIS recommendations. Note there are no rules, but only recommendations. It will be the TD at every competition event that will evaluate, depending on conditions, how extensive B-net netting that will be required for a safe event. High speeds, or challenging terrain, may require double or even triple parallel B-nets. If space is lacking to mount required B-net properly, then A-net will be required. I cases with parallel B-net, these should be separated by more than 2m, or less than 0.5m. This in order to prevent that the first B-net lift the skier up over the following B-net. In addition, two net mounted in a row needs to overlap each other, like fish scales, to prevent skiers to pass between the two B-net.

#B-net 0.4x25

#B-net 0.4x25

#B-net 0.4x25

40cm high and 25m long, red or blue B-net, with 3.5mm cord and 10x10cm mesh. Preferably mounted on #PC160/35 fence poles.

B-NET

#B-net 1.3x15

#B-net 1.3x15

1.3m high, 15m long, B-net, with 3.5mm cord and 5x5cm mesh. Available in red or blue.

#B-net 1.3x15.L8

Same as above, but completely assembled with 8 pieces of 180cm long B-net poles.

#B-net pallet

Galvanized stackable transport and storage pallet. Suitable for both B- & C-net. Fits 13 complete B-nets and can be stacked 2 or 3 pallets high for efficient and airy storing. Width 120cm, length 150cm and height 133cm.

B-net pallets are stackable and are perfect for summer storage of nets, mattresses and other bulky products. Up to 4 pallets can be stacked on height.

B-nät Special requests:

We are able to, on special request, offer B-net in different heights up to 2m, as well as with 5x5, 7x7 or 10x10cm mesh openings. These are outside of standard sizes, and require longer lead times.

Contact us for more information.

A-net:

Also A-net can be custom ordered.

Slip skirt:

And also Slip Skirt.

Fall safety net:

And certified custom made lift fall safety nets.

What really sets Beyond-X apart from the rest is that we, as one of few brands, own our very own production facility B-stedt Polska.

Founded in 1999, this is the core of our operation, and is the reason why we can offer such incredible flexibility, wide product range, no order minimums, and great delivery reliability.

To operate a 70 employee operation is at times very demanding task to handle. However, being located inside EU, with almost all operations in-house, this offers unique advantages, that our competitors can only dream of!

Extremely short lead times, with no order minimums! This is something that normally does not exist! For products like race bibs or digital printed C-net, this is a key factor for success. We are simply in control, and not dependent of others.

The combination of digital printing and sewing is our specialty. We are a world leader producer of alpine race suit. We also produce these for a number of other brands. Today the factory also is producing far more than skiwear. Including slalom poles, Safety mattresses, kids ski area play-ground articles, safety and crowd-control fencing, signs, gate panels and luggage, to name a few.

Our digital printed C-net is nowadays being used also as sign material. These easy to transport and set up, great looking, and highly visible net are also a great value, and keep finding new areas of use, not limited to winter sports.

Again, no order minimums, and printed from both sides, where back side will be shown mirrored. But as bright and crisp as the front.

PP1.2+L10 WP

PP1.2+L20 WP

It all started with a need to print on C-net, to send a message or display a sponsor. Screen printing of nets had a lot of limitations. Our purchase of a special heat press now allows us to use our digital printing capacity also on C-net. Since then, this segment has grown.

Nowadays these prints are being made on recycled polyester.

ø35mm C-poles are available in red or blue, and several lengths:

PC63/35, 63cm long pole for mounting 60cm high net, on MP1700 Steel platform.

PC95/35, 95cm long pole for mounting 60cm high C-net in snow.

PC123/35, 123cm long pole for mounting 120cm high net, on MP1700 Steel platform.

PC160/35, 160cm long pole for mounting 35, 60 & 120cm high C-net in snow.

Pole tunnels sewn in PVC-coated fabric are available in black, red, blue, white, yellow, green or orange.

PP1.2+L20 WP

PRINTED C-NET

Digital printed C-net have over just a few years, become very popular, due to their versatility, were they may be used as advertising banners, information signs, or as caution panels to warn about potential dangers.

Or simply being used as C-net offering a unique custom look, that may coral events, or event arenas.

If used for advertisement these net can turn the cost for acquiring C-net, in to a source of income! And digital printed C-net can, if the design allows, look stunning! Every design that can be printed on a home computer printer can also be printed on these C-net.

Both sides are printed and equally bright. However, the back side will appear mirrored.

A complete C-net can include non printed Polyfence net sections and printed 2.5m long sections, freely placed according to customers wish.

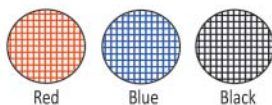

Net sections are joined by a net pole tunnel in durable PVC-fabric, and 35mm Ø PC-pole. Such poles (essentially B-net poles) offer stability, yet will flex if skied in too. Will dampen the winds force, and will aid in keeping these net nicely stretched and great looking.

We produce these in up to 25m lengths. And also the printed sections allow wind to pass through.

The nets can be ordered in 35, 60, 80, 100 and 120cm heights. 35cm are only available as fully printed.

One news is that each end of the nets now is equipped with a zipper, making it possible to attach several nets to a longer one. Or insert ZipOn printed sections between.

Non printed net sections use red, blue or black 1x1cm mesh Polyfence.

+FP0.35x2.5 WP, add-on fully printed net section, with a pole tunnel and PC-pole.

FP0.35+PC L10 WP

Correct C-net mounting

A nicely stretched net, is also a correct mounted net! Our ø35mm PC-poles elasticity greatly aids in achieving this. Simply drill a 35mm ø hole at a 3-7° angle away from the net section, and then stretch the net to be able to insert the pole in to the hole. The pole will then act as a spring that stretches the net.

The Zip-On version takes our C-nets to a new level!

All parts, nets, printed sections and tunnels with poles are assembled with zippers. That way, parts can be assembled in any order to any length. If needed,

printed or unprinted sections can be added or removed easily. A damaged section can be replaced, instead of the whole net. Nowadays our unprinted C-nets

come with end zippers, that also fit together with our ZipOn sections. Our pole tunnels can be combined with different pole lengths, for different mounting heights above the ground.

2.5m long digital printed ZipOn net sections offered in different heights.

PRINTED C-NET

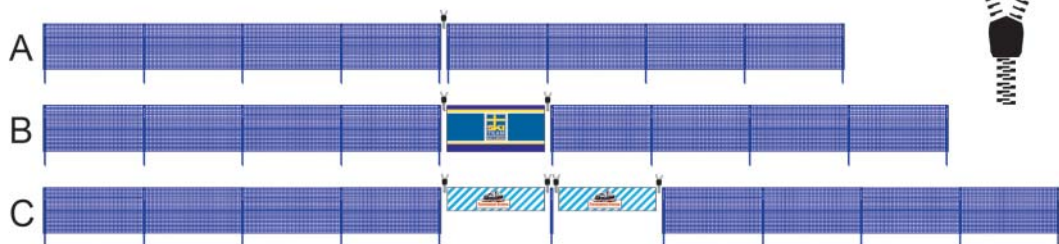

**NEWS!**

All standard unprinted POLYFENCE and SNOWFENCE, in different heights, will be produced with a zipper at each end.

That means two standard nets can be connected with the zippers, creating a longer net (A).

Alternative, you can also add printed ZipOn sections between the standard nets (B).

It is even possible to insert printed ZipOn sections with lower height than the standard nets (C).

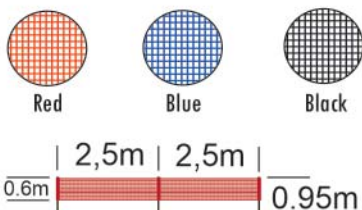

Beyond-X C-net "Crown control fencing" are offered with different mesh-size, colors, heights and lengths, for all kinds of use. The nets can be bought on roll, with poles and hooks. Or, the more common way, with sewn in pole tunnels that includes 35mm PC-poles. We also offer custom-made requests.

Our **POLYFENCE** net has 1x1cm mesh that lets wind through, but prevent poles and boot buckles from getting caught. That makes them ideal for lift lines. Reinforced at upper and lower edge. In black, blue and red.

As standard, these nets are made with pole tunnels in matching color, but can be customized with tunnel color of choice and/or screen printed tunnel logo. **POLYFENCE** is the net mostly used in our partially printed nets.

Simple brush base, fits 31mm poles.

#FG160/31, 160 cm long 31mm PC poles. For mounting with C-net hook.

#FG162H, 162cm long fiberglass pole with metal point and two permanent hooks (for nets without sewn tunnels).

#FG95, 95cm long fiberglass pole with metal point and top (for nets with tunnels, or with #EW19 hooks).

#FG162, 162cm long fiberglass pole with metal point and top (for nets with tunnels, or with #EW19 hooks).

#PC160/35, 160cm long 35mm PC pole. For 120cm high net with sewn tunnels, mounted in ground drill holes.

#PC123/35, 123cm long 35mm PC pole. For 120cm high net with sewn tunnels and metal platform #MP1700.

#PC95/35, 95cm long 35mm PC pole. For 60cm high net with sewn tunnels, mounted in ground drill holes.

#PC63/35, 63cm long 35mm PC pole. For 60cm high net with sewn tunnels and metal platform #MP1700.

C-NET

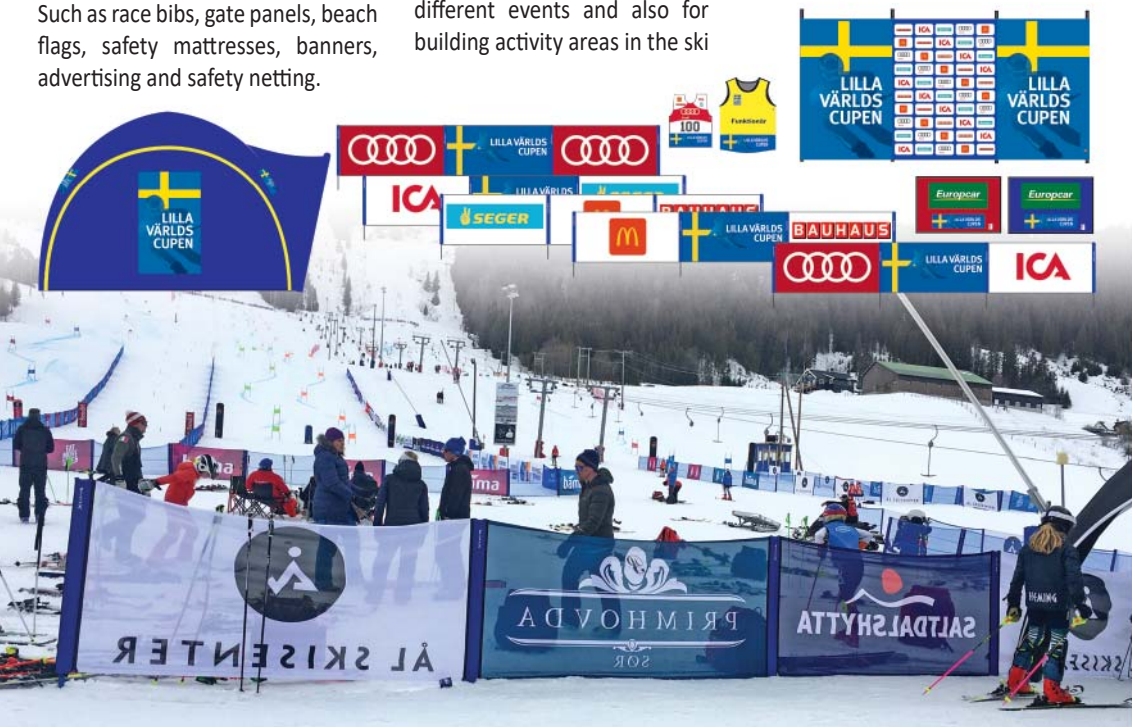

Beyond-X has evolved into being almost an advertising agency for the alpine skiing sport. With the great difference that we print on utility products, that are needed to run competition events. We offer a large range of products, that are suitable for ski competition arena building. Such as race bibs, gate panels, beach flags, safety mattresses, banners, advertising and safety netting.

All is digital printed, requires no minimum orders. Perfect for large, as well as smaller event.

In addition we offer netting, slalom poles and FUNSKI articles, all useful for arranging different events and also for building activity areas in the ski

area. Like self-timer, SkiCross tracks, dual race arena and kids playground, to mention a few.

Great exposure of sponsors, that can contribute to part, or all, of the purchasing cost.

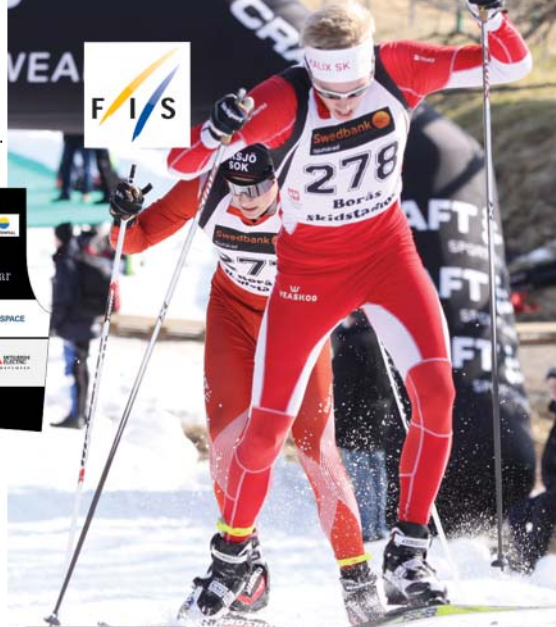

XC352 X-Country

Since 2024 we are a part of Swedish Ski association ski area pool "MÖTESPLATS SNÖ". This also includes X-country skiing. We have some X-country specific products in our range. But much of our alpine assortment is also suitable for X-country skiing.

Our specialty is the combination of sewing, digital printing and no order minimums.

Digitally printed C-net enables great exposure of sponsors, that can reduce, or remove, the investment cost. More info in pages 88-98. Safety B-net, see pages 84-86 for more info. Mattresses can also be custom printed. See pages 69-73 for more info.

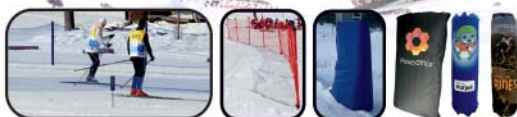

FUNSKI is a rapid growing segment of kids' ski playground products. Most of the products are custom printed. This also enables exposure of sponsors, that can reduce the investment cost. For more info, see pages 101-109.

Lierplast "Organ stomp" for both winter and summer skiing (roller ski). Lierplast V-board in different options, with or without print. Contact your reps for more info.

Signs in different shapes and sizes. Printed plastic signs with UV- and scratch protection, with smart mounting brackets. For more info, see pages 77-79.

Sewn gate panels in different sizes. See pages 45-49 and 65, for more info.

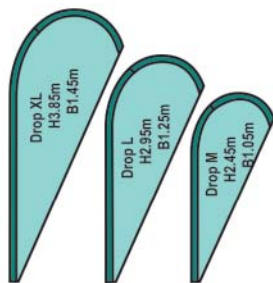

Delimiting poles, brush markers and barrier tape. See page 52-53, 68 and 74-75, for more info.

X-COUNTRY

Digital printed Beach Flags in different shapes and sizes, as well as different bases. A complete beach flag requires flag, antenna and a foot / anchor.

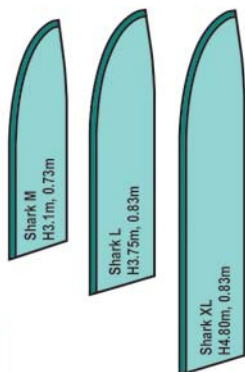

F560 Composite Antenna XL
Fits all size XL flags.

F430 Composite Antenna L
Fits all size L flags.

F360 Composite Antenna M
Fits all size M flags.

F290 Composite Antenna S
Fits all size S flags.

Ground Platform
40x40cm, weight 5kg.

Fold-out X-foot
For indoor use, weight 4kg.

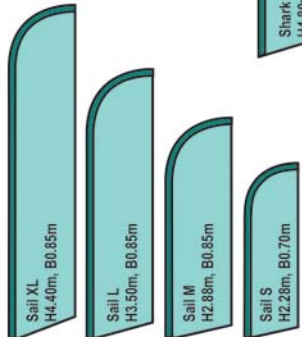

Wall Mount

Ground Anchor

Ground / Snow Screw

Cement-foot,
10kg

Water-tank hard
Filled weight 12kg.

Water-tank soft
Filled weight 8kg.

Elastic Loop 20cm

For simple mounting of banners on, for example B-nets.

Digital printed banners

Made of the same fabric as being used for digital printed C-net. But here printed only from one side. The fabric allows wind to pass through. The banners are equipped with metal grommets. Maximum height 1.45m and up to 100m in length. Pricing/m2.

FUNSKI

Kids stuff

Beyond-X FUNSKI Kids ski area playground products is a segment under rapid growth. We offer a wide selection of affordable products that can be custom printed in own colors and designs, with no order minimums. This enables good exposure of sponsors, that can help financing the purchase.

One news is that we now offer 3D soft figures. And we take it one step further, by offering these figures with digital prints. We currently only offer custom-made 3D figures, but in the near future, we will develop an assortment of standard figures. Contact your reps. for more info.

brush base

#STUMPIE

#BG25 Brush gate turning aid. 25cm long bristles. 30mm Ø bas. Available in colors red, blue, pink and green.

#BM17 Brush marker turning aid. 17cm long bristles and 14mm Ø base. Available in red, blue and green.

#STUMPIE turning aid. 80cm long soft mesh tube with a smart and simple brush base. Available in green, blue and red.

Kids ski school bibs have become very popular. Digital sublimation printing technique has made it far easier to print almost anything, with no order minimums.

We offer several different vest models, in several sizes, to fit kids of all ages and needs.

#A310 Men's FIS stretch race bibs are very popular due to high stretch and easy to make fit on kids of many sizes. Available also in smaller ladies size #A311. And even smaller kids size #A312.

#SX412 Kids size Ski-cross vest. Also available in larger ladies size #SX411.

#SX423 Kids XS older version Ski-cross vest, exists also in the regular kids size #SX422. As well as the larger ladies size #SX421.

On Ski-cross bibs edge band color can be selected from black, red, blue, white or yellow.

As usual, we require no order minimums for own print designs.

See page 28-32 for more information.
